Food Engineering

GENERAL ALPHABETICAL INDEX

Volume 23

JANUARY, 1951, to DECEMBER, 1951

A

Adhesive can take hot or cold (e)....Jan 98
Advertising—Endless conveyor for advertising (e) .....July *85
Aeration gives low-cost waste disposal. W. A. Hasfurther.....Feb *90
Agitator—New hydrogenator for fast jobs (e) .....June *125

Air Compressors

Air compressor—how to get the most out of it. T. G. Hicks.....July *72
Control devices and trickle cooler takes burden off air compressor June *9
With electrical control (e).....Apr *137

Air Conditioning

Advanced air conditioning boosts bakery output. N. Feder.....Sept *109
Bulb is air purifier (e).....Oct 123
Unit heaters supply air conditioning. Roy Emison .....Nov *7
Air-pollution tester (e).....Apr *147
Albumin from cheese whey (P).....Jan 125
Algae grown continuously in laboratory system (A).....Dec 175

Aluminum

Aluminum foil for cookies.....Apr *182
Cans of aluminum foil coated with plastic and cans of aluminum foil welded to steel sheet.....Nov 162
Frozen meals encased in aluminum Nov *156
Report on emergency packaging Apr *123-134
American Assn. of Cereal Chemists officers (N) .....July *162
American Bottlers of Carbonated Beverages. Exhibit of equipment....Dec *86
American Butter Institute—Chicago meeting (N) .....Jan 148
American Meat Institute—Council on Research meets (N).....May 186
Meat-processing units displayed. Nov *78
American Society of Bakery Engineers—Chicago convention (N).....Apr 216

Apples

Costs and methods for pie-stock apples. V. F. Kaufman (tables) Dec *97
Knouse Foods Cooperative makes big strides in apple processing. J. Y. Ziemba .....Feb *111
Mechanized apple-slice and sauce line flowsheet .....Feb *136
Non-frozen apple concentrate (A) Dec 167
Prepackage bag for apples.....May *149
Refrigerated gas storage extends life of apples (A).....Oct 182
Water problem for apple products plant solved by hill-top reservoir Nov *57
Ascorbic acid retained in tomato paste by cool storage (A).....Dec 168
Ascorbic acid and sodium nitrate ups life of dry milk (A).....Nov 169

Awards

Food Engineering receives an award from Industrial Marketing (N) Aug *188
1951 Food Engineering Award goes to Andersen's Foods (N).....May 182
June *67, (N) Aug *188
Stroud Jordan Award goes to J. A. King (N) .....May 182

B

Bacteria

Bacterial count in vegetables reflects plant conditions (A).....Mar 175
Cathode rays work—but.....Apr 215
Flat-sour bacterial growth not prevented by subtilin (A).....Oct 171
Germicidal lamps curb bacteria on sugar at Canadian refinery. A. F. Blake .....Jan *77
How frozen concentrate biochemists are working out the fruit bugs. C. G. Beisel.....Nov *82
"Just-in-case" tips on condemnations. Winston & Winston.....Oct *81
Liquid germicide (e).....Dec *131
Moisture content of canned prunes controls mold development (A).Oct 171
Microbial growth in sausage depends on casing used (A).....Nov 170
Peracetic acid a new bactericide-fungicide .....Oct 131
Projection method speeds bacteria counts. Thomas Knowles.....Feb *129
Resistance of bacteriophage to acids and alkalis (A).....Apr 192
Baffle of glass balks air, betters product. A. C. Smith.....Jan *52

Bags

Automatic bag closer (e).....July *95
Automatic valve bag packer (e).June *29
Bag holder (e).....Sept *119
Bag making machine (e).....May *105
Combination unit packs produce (e) Apr *140
Flattens bags, loads pallets (e)..Feb *151
Machine closes both cellophane and kraft bags (e).....June *117
Packaged feed plant easy to install (e) .....Nov 105
Packaging show at Atlantic City June *110
Rotary bag-sealer (e).....Aug *133
Sealer closes paper bags easily (e) Nov *117
Semi-automatic machine for closing paper bags (e).....Sept *125
Small closer for bags (e).....Feb *150
Strength of Kraft paper bags tested (A) .....Nov 170

Bakeries and Baking

Advanced air conditioning boosts bakery output. N. Feder.....Sept *109
Bakers yeast—unique product. F. W. Nordslek .....Feb *101
Bakery rack washer (e).....Mar *160
Batch weighing banished by new homogenizing twist. Anderson & Mullen .....Oct *67
Bite size saltines.....Nov *159
Borden's new spray-dried baker's cheese .....Nov *76
Bread biscuits .....Oct *162
Cake-frosting device improves filling operations .....June *11
Casein improves pie crust mix (P) Jan 132
Coconut macaroons that stay fresh Oct 188
Continuous mixing process gives uniform batters (P).....May 157
Cookies in heat-sealed bag.....June *164
Costs and methods for pie-stock apples. V. F. Kaufman (tables) Dec *97
Doughnuts of quality—at 700 doz. an hour. Zenas Block.....Jan *55
Drake Bakeries produce better quality cakes with new processes. Ward & Hackett .....Oct *102
Dusting starch curbs insects....May 105
Electric oven benefits cited by baker. J. M. Bemis.....Feb *124
Farm Crest's automatic biscuit plant hook-up of drives and controls. May *99
Fungal enzymes help you make better bread. Johnson & Miller pt 1..Mar *80
pt 2 Apr *161
Long-keeping mixes (P).....May 157
Matzoth production line speeded by weigher-stacker .....June *94
Mechanized bread making.....July *102
New Jersey coconut plant is built to product. R. J. Boddington....Nov *68
Prechilling flour employed in cake batters. R. W. Selman.....Nov 179
Pretzel output multiplied with continuous straightline production. J. L. Dooley.....July *56
Pumpkin pie filling.....Apr *184
Quality fondants readily made for bakers, confectioners. R. N. Prince Aug *100
Reduction in pH of batter improves cake quality (A).....Sept 170
Robotizing bakery operations. L. E. Slater .....Aug *73
Sandwich spreading machine for crackers (e) .....Feb *152
Sharper flavor ratings of vanilla pound cake with improved profile test. Cartwright & Kelley....Sept *71
Shortening selection important to prepared mixes. G. T. Carlin.....July 113
Siegrist Pie Co.'s new streamlined process economized mass output of fried pies to maintain popular price. G. W. Massey.....Sept *86
Silicones speed sanitize processes. T. A. Kauppi.....Jan *44
Trends bring shifts in baking ingredients. A. B. Paul.....Feb *94
Unit proofs, molds, pans buns automatically (e) .....Nov 111
Waffles, pre-baked, frozen.....May *148
Bananas—Preserving bananas with sugar plus heat (P).....Jan 125
Refrigerated 5-room plant steps up production in Los Angeles.....Nov *141

Barrels

Paper covers guard barrel contents (e) .....Feb *147
Ready to cook live lobsters and clams in unique package.....Nov *156
Battery charger (e).....Jan *98, Aug *129
Battery-charger, compact (e).....Dec *127
Pre-freezing process insures green color of legumes (P).....May 159

Beer

Addition of ascorbic acid improves light beers (A).....Apr 198
Beer by tank trucks (A).....Nov 174
Beer color measurement (A).....Nov 172
Bottling unpasteurized beer (A).June 178
Filter for beer (e).....Feb 159
Methods of beer filtration (A)...Jan 126
Preventing haze in beer (A)....July 135
Small quantities of glutamates improve flavor of beer (A).....Sept 174
Beer—see also Brewing

Beverages

Beverage quality and how to assure it (tables). S. S. Epstein.....Sept *100
Chocolate milk—to pasteurize more heat or longer hold (A).....Aug 169
Coca-Cola operates 21 mobile labs to check quality. A. V. Gemmill..May *62
Cocoa-cream drink .....Oct *164
How to make stainless steel go further is shown by orange drink plant. E. F. Hansen.....Nov *62
Licorice-flavored soft drinks....July *128
Nedick sets up operations in building designed for other purposes. E. F. Hansen .....June *149
Stable chocolate drinks (P).....Nov 174
Bin-level indicator (e).....Dec. *127
Bins—Flour bin bearing made of nylon (e) .....Sept *121
Blanching—Continuous electronic blanching proved feasible in pilot plant May *81
New blanching device (P).....June 172

Bottling

Coca-Cola operates 21 mobile labs to check quality. A. V. Gemmill..May *62
Corrosion of glass surfaces by alkaline solutions (A).....Sept 175

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Elevator adjustable for bottle size (e) ..... Jan *97
Empty bottle inspector unit (e) ..... Sept *131
Engineered units increase efficiency and lower maintenance expense. E. D. White ..... July *78
Liquid caustic handling made safe. J. H. Herzog ..... Nov *7
Non returnable soda bottles ..... Nov *162
Plastic-wire bottle carrier (e) ..... July *99
Predissolved caustic brings bottlers numerous benefits. H. E. Korab Oct *84
Two "robot" units spur brewer's bottling operation. F. & M. Schaefer ..... Nov. *89
Unloads cased bottles automatically (e) ..... Jan *96
Washer feeder table (e) ..... July *87
Washer handles any size, shape milk bottle (e) ..... Nov *113

Boxes

Box life extended by wood preservative ..... Oct *13
Lightweight aluminum boxes (e) ..... Sept *117

Bread

Batch weighing of white bread banished by new homogenizing twist. Anderson & Mullen ..... Oct *67
Dough trough (e) ..... Mar *155
Dried buttermilk improves bread loaf volume (A) ..... Aug 169
Fungal enzymes help you make better bread. Johnson & Miller pt I Mar *80 pt 2 ..... Apr *161
Mechanized bread making ..... July *102
Quality of breads from quick-frozen dough (A) ..... Oct 171
Sample slices increase bread sales ..... Oct *160
Yeast mix cabinet (e) ..... Dec *125

Brewing

Alkaline cleaner for removing beer deposits (e) ..... Aug 133
Ambrosia Brewing triples output by rapid pasteurizing and speeding sanitation ..... Oct *111
Automatically controlled malting apparatus (P) ..... Jan 134
Blatz Brewery—how to set a safety record. G. R. Meyers ..... May *94
Bottle washing with liquid caustics J. H. Herzog ..... Nov *7
Clean air means better products. Feb *75
Continuous blending with flow control system. Kiewal & Slater ..... July *58
Glass baffle balks air, betters product. A. C. Smith ..... Jan *52
Gulf Brewing—products bettered, plant modernized, promotion intensified—keys to profits. C. E. Liebman ..... Dec *88
Theo. Hamm Brewing Co's teaming of engineering and control assures expansion tuned to quality. Lang & Wooley ..... Aug *92
High temperature extraction cuts hop substance losses (A) ..... Dec 170
Hops added by high frequency (A) ..... July 145
Hop extracts exceed value of fresh hops (A) ..... Oct 179
How west coast brewery solved disposal problem. C. R. Havighorst ..... June *142
Improved malt kiln (A) ..... Aug 173
Instruments take hold in brewing. L. E. Slater ..... Apr *93
Henry F. Ortlieb brewery achieves capacity output in spic-and-span plant. F. W. McCarthy ..... Oct *98
Protein coagulation by wort boiling (A) ..... July 138
Recorders assure better brews. Appel & Thew ..... Mar *119
San Francisco Brewing Co. suspends tanks to equalize foundation pressure ..... Sept *145
Two "robot" units spur brewer's bottling operation. F. & M. Schaefer ..... Nov *89

Brewing see also Beer

Brine—how a few easy to use tank markers solve brine makeup problems. D. W. Kaufmann ..... Dec *108

Browning—Curbing discoloration of fruit ..... Oct 190
Apple juice oxidation (A) ..... Dec 168

Butter

Iowa butter maker switches to continuous operation and secures six top benefits ..... Apr *98
Speedier butter packaging ..... Dec *86
Vitamin A potency of butter not cut by neutralization (A) ..... Dec 172
Butylated hydroxyanisole ups shelf life of salted nuts. Cecil & Woodroof Feb *81

C

Calcium salts—Fruit and vegetable slices firmed by calcium salts (P) ..... Aug 171
Canadian Institute of Food Technologists formed (N) ..... Aug 194

Canning and Preserving

Acid foods heat irregularly ..... Apr 215
Antibiotic hunt gets boost ..... Apr 215
Antibiotics not effective against Cl. botulinum (A) ..... May 158
Aseptic canning in action. C. R. Havighorst ..... Feb *72
Can for high-salt product? ..... May 172
Canned orange juice flavor not protected by deaeration (A) ..... June 172
Canning frozen salmon (A) ..... Sept 169
Citrus canners solve waste problems and recover solids. C. E. Wright ..... Sept *107
Citrus juice flowsheet ..... Jan *104
Concentrated citrus juice plant features advanced processing technics. Hopkins & Walker ..... Jan *67
Continuous aseptic process ..... June *68
Cool storage of canned foods aid ascorbic acid retention (A) ..... Dec 168
Costs and methods for pie-stock apples V. F. Kaufman (tables) ..... Dec *97
Corn—adding brine to kernel corn ..... Sept 180
Desodumized meat ..... July *128
Detecting small leaks in cans (A) ..... Mar 171
Device detects inverted cans. E. F. Hansen ..... Mar *135
Dried milk products guarded by quality control. Becker & Becker ..... Nov *90
End over end rotation of cans during processing speeds heating and cooling (P) ..... Feb *169
Fresh milk canned. Bloomberg & Hessey ..... June *71
Frozen salmon canned (N) ..... May 188
Germicidal lamps curb bacteria on sugar at Canadian refinery. A. F. Blake ..... Jan *77
High-profit claims fade under probe of canners (charts and tables). J. A. J. Jones ..... Aug 112
Infra-red continuous broilers make meat balls better for canning. Ray Bloomberg ..... Oct *91
Inspecting cans with crystal x-ray device (e) ..... Apr *135
Knouse Foods Cooperative makes big strides in apple processing. J. V. Ziemba ..... Feb *111
Mammoth Spring Canning Co. improves processing 8 ways. I. C. Miller ..... Jan *86
Mechanized apple and sauce line flowsheet ..... Feb *136
Mechanized continuous preserving process pays six extra benefits. I. C. Miller ..... Sept *103
Midwest canneries—short cuts in picking ace workers. J. S. Walters ..... Dec *69
Nedick sets up operations in building designed for other purposes. E. F. Hansen ..... June *149
New canning units caught eyes at Chicago ..... Apr *174
Open-pressure cooker tested in lab for possibilities. L. L. Kemble. Dec *143
Pack diced salmon in 4-lb cans. Ray Bloomberg ..... May *93
Preservative coating aids fruit canners (e) ..... Nov 119
Preventive quality control as shown by Crosse & Blackwell. B. W. Clarke ..... Mar *74
Prize process—aseptic canning flowsheet ..... June *134
Process for improving vacuum-canned ground meats (P) ..... July 133
Prunes—moisture content control, mold development (A) ..... Oct 171
Quality peeling sets new pace ..... Dec *106
Resins for can linings ..... Feb 166
Salvaging Kansas City's flood-hit foods ..... Oct *142
Shear-press predicts quality of canned limas. Amihud Kramer & others ..... Apr *112
Synthetic can linings for protection. S. L. Flugge ..... Aug *114
Tinless cans ..... Nov *162
Unit automatically caps, bands 21 cans per minute (e) ..... Sept *129
Casein improves pie crust mix (P) .. Jan 132
Caster, heavy duty (e) ..... May 115
Cellophane and wax paper wrapping. Apr *180

Cereals

Glamorized corn mush ..... Aug *163
Korn Pops ..... Aug 163
Post Toasties flowsheet ..... Nov *74
Post Toasties gets uniformity-plus in high volume production. L. E. Slater ..... Nov *71
Specific heat of wheat (A) ..... Oct 180
Starch from wheat flour (A) ..... July 134

Cheese

Albumin, sugar-free, from cheese whey (P) ..... Jan 125
Borden's new spray-dried cheese. Nov *76
Cheddar cheese process (P) ..... May 157
Cheese-flavored paste ..... Feb 162
Gelatinous cottage cheese (A). Dec 172
Ice cream freezer converted to cheese cooker. F. V. Kosikowsky ..... May *5
New roquefort-type flavors. Stuart Patton ..... Dec. *93
Liquid cheese ..... Aug *160
Pasteurized milk cheese speeding flavor development (A) ..... Nov 169
Poor quality cheese results from antibiotics in milk (A) ..... May 157
Resistance of bacteriophage to acids and alkalis (A) ..... Apr 192
Swiss cheese whey gives useful protein food (A) ..... July 136
Wax coating cheese with belt-line technic. L. E. Slater ..... Oct *92

Chemicals

Chemicals controversy scorches industry (ed) ..... Dec 132
Chemicals in foods—times call for adherence to fundamentals (ed.) ..... Sept 132
Chemicals vs. foods: round two Jan *50
Two-year test of chemical toxicity sets worthy example (ed.) ... Feb 126
War hits major chemicals used for food packaging. R. F. Warren. Apr 129

Cherries

Phytates will stop maraschino cherry discoloration. Cohee & Nelson. Mar *91
Standards, sulfured revised ..... July 170

Chlorine

Chlorinizer ((e) ..... Feb *158
Compounds of chlorine stop final decay of fruits and vegetables (P) ..... Aug 172
Not allowed for food processing (N) ..... May 181

Chocolate

A & P Tea Co. engineers rigid quality control system for candy products. J. V. Ziemba ..... Oct *75
Chocolate spoilage can be minimized (A) ..... Aug 170
Cocoa-cream drink ..... Oct *164
Determining cocoa fineness ..... Aug 182
Frozen concentrated chocolate drink ..... Jan 116
Improved conche (P) ..... Apr 196
Low-fat cocoa powder made by new process (P) ..... Apr 196
Melting, tempering and enrobing diagram used by candy maker May *88
Pasteurized chocolate-flavored drink ..... Sept *166
Soluble chocolate essence (P). . Feb 174
Stable chocolate drinks (P) ..... Nov 174
Vitamin-enriched cereal and cocoa disks for army field rations (N) ..... Oct *206
Circuit breakers, steel enclosed (e). Jan 101
Clams—Ready to cook live lobsters and clams in unique package ..... Nov *156

Cleaning

Alkaline cleaner for removing beer deposits (e) ..... Aug 133
Cleaning aluminum ..... May 5
Cleaning rinse for filled cans. Phil Lance ..... Feb *130
"Fog" unit for sanitizing tanks (e) ..... Feb *158
Fritos—corn chips—new functional L. A. plant. Bill Crow Jr. ..... Apr *102
How frozen concentrate biochemists are working out the fruit bugs. C. G. Beisel ..... Nov *82
How to make stainless steel go further is shown by orange drink plant. E. F. Hansen ..... Nov *62
Liquid caustic system cleans dairy equipment. George Griffel ... Jan *113
Machine cleans, sterilizes food bugs (e) ..... Dec *116
Permanent pipelines cut cleaning costs, dairy. Fleischman & Holland ..... Nov *58
Posters sell workers on cleanliness ..... Jan *54
Predissolved caustic brings bottlers numerous benefits. H. E. Korab ..... Oct *84
Removing carbon from pans ..... Aug 183
Selling management on plant sanitation. C. W. Griffin Jr. ..... June *76
Silicones speed, sanitize processes. T. A. Kappil ..... Jan *44
Steam muffler cleans evaporator tubes faster at Danish Creamery Assn. George Smith ..... Oct *101
Tube cleaner for heat exchangers (e) ..... Aug *119
Wallmaster washes all interior walls (e) ..... May *115
Coating applied to metal surfaces with vacuum gun. E. Anderson ..... Jan *115

Coconut

New coconut tidbit ..... July *131
New Jersey coconut plant is built to product. R. J. Boddington ... Nov *68
Toasted coconut in colors ..... June *162
Code dating labels. W. T. Guzle ..... Jan *115
Code in jar caps. W. A. Reed ..... Nov *11
Codes inner flap of carton. Conrad Frelor ..... Feb. *132

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Coffee

Improved soluble coffee (P).....Feb 174
Martinson, Jos. & Co. coffee company uses smokeless roasters.....Nov *133
Martinson, Joseph & Co.'s coffee processing from bean to package .....Oct *134
Packaging dry foods "regimental" style. J. V. Ziemba.....Mar *102
Pressure-packed coffee .....Jan *116
Coils—Siptal-coil computations. J. T. Hogan .....Mar *133
Colloids—Nitrogen technic assures fine grinding. Gerard Miller.....July *36

Coloring

Beer color measurement (A)....Nov 172
Color in oleo evaluated (A).....Nov 170
Food color blends.....Aug 165
Vitamin color stability (A).....Nov 173
Compressor, horizontal duplex (e)...Mar *152

Concentration

Citrus juice concentration by freezing advanced by engineering. F. K. Lawler .....Oct *68
Citrus juice flowsheet .....Jan *104
Concentrated milk makes its debut .....Mar *165
Florida still expanding frozen citrus plants (N) .....Jan 142
Frozen apple concentrate (A)....May 159
Frozen concentrated chocolate drink .....Jan 116
Frozen concentrated milk.....July 35
Frozen concentrated pineapple juice .....Aug 163
Fruit juice concentration without loss of flavor (P) .....Apr 195
How frozen concentrate biochemists are working out the fruit bugs. C. G. Beisel.....Nov *82
Newest citrus juice plant features advanced processing technics. Hopkins & Walker.....Jan *67
Non-frozen apple concentrate (A) Dec 167
Orange concentrators face tough cost-price problems. C. E. Wright .....Feb 109
Pilot evaporator points way to new juice concentrates. Carleton & Curtis .....Aug *149
Temperatures during handling and storage influence quality of citrus concentrates (A) .....Sept *169
Thin-film evaporator concentrates in single pass (e).....June *119

Confectionery

A & P Tea Co engineers' rigid quality control system for candy products. J. V. Ziemba.....Oct *75
Aerating process for foam-type confections (P) .....June *171
Candy maker's 9-step revamp shows how to boost your plant efficiency. C. L. Smessaert.....May *86
Candy and other small-volume items delivered daily to company outlets by Sanders Inc. J. V. Ziemba..Sept *90
Chocolate spoilage can be minimized (A) .....Aug 170
Chocolate temper tested by new method. Easton, Kelly & Bartron .....Aug *147
Circulating refrigerated air cools melted chocolate (P).....Aug 171
Color fading in candies.....May 172
Confectioner increases output with advanced units and technics. J. V. Ziemba .....June *96
Confectioners' creams made continuously (P) .....Mar 172
Emulsifiers improve coatings for Army candy rations (A).....Oct 171
Filler and batch former (e).....Jan *96
Gaging moisture absorption in the high-sugar foods (A).....Dec 170
How to vitaminize candies. A. E. Leighton pt 1 Mar *164 pt 2 Apr *169
Kor-Jels pan-coated, jelly center candy .....Aug 163
Marshmallow production—continuous processing proves a bonus. Lancaster, Wing & Kessler.....July *53
Nuts: better kept — better candy. Woodroof & Cecil.....Nov *129
Pure syrup from candy trims. Childs & Ciccone .....July *79
Quality fondants readily made for bakers, confectioners. R. N. Prince .....Aug *100
Sorbitol will keep candy soft and moist (N) .....June 203
Sugar handling by conveyor in confectionery plant.....Feb *130
You can double output by modernizing. J. V. Ziemba.....Jan *47

Containers

All-temperature container .....Feb *167
Aluminum pack for scrapple....Sept *164
Bowman Dairy and Sealright perfect their special carton forming and filling machine. L. E. Slater..May *82
Packaging show at Atlantic City .....June *110
Paperboard cartons are water and strain-resistant (e) .....July 95
Printing shipping cases as they are needed .....Feb *117
Report on emergency packaging .....Apr 123-134
Synthetic can linings for portection. S. L. Flugge .....Aug *114
Washable drums, pails with polyethylene lining (e).....Aug *123

Continuous processing

A & P Tea Co. engineers' rigid quality control system for candy products. J. V. Ziemba.....Oct *75
Acidity of cream continuously checked, neutralizer added as needed. L. E. Slater.....Sept. *98
Cheese coating with wax goes continuous. L. E. Slater.....Oct *92
Continuous aseptic process.....June *68
Continuous blending of beers with flow control system. Kiewal & Slater .....July *58
Continuous marshmallow production proves bonus process. Lancaster, Wing & Kessler.....July *53
Infra-red broilers make meat balls better for canning. Ray Bloomberg .....Oct *91
Iowa buter maker switches to continuous operation and secures six top benefits .....Apr *98
Mechanized continuous preserving process pays six extra benefits. I. C. Miller .....Sept *103
Pretzel output multiplied with continuous straightline production. J. L. Dooley .....July *56
Prize process—aseptic canning flowsheet .....June *134
Quality doughnuts—at 700 doz. an hour. Zenas Block .....Jan *55
Wine made continuously (P).....Sept 173
Contracts—Better look into cost implications of government contracts (ed.) .....Feb 126

Controlled Materials Plan

CMP tightens squeeze (tables)...Nov 137
How to operate under CMP.....July 49
What it is, what it does.....June 93

Controls

Continuous blending of beers with flow control system. Kiewal & Slater .....July *58
Hydraulic control system (e)...Sept *119
Instruments on parade — Houston Show .....Nov *64
Instruments take hold in brewing. L. E. Slater.....Apr *93
Integrated control system for flow control (e) .....Dec *115
Midwest dairy tests pasteurizers and all controllers to avoid shutdowns. W. O. Whitney .....June *75
Non-indicating controller with "lock-up" feature (e).....Oct *121
Philadelphia meat company re-evaluates its plant equipment, saves dollars, ups quality. Zitten & Evans .....Oct *147
Pillsbury's output of baking mixes controlled by electronic system. L. E. Slater.....June *80
Pushbutton power drive control (e) .....Feb *156
Recorders assure better brews. Appel & Thew .....Mar *119
Robotizing bakery operations. L. E. Slater.....Aug *73
Starter's enclosure gives added protection (e) .....Sept *129
Speed control device (e).....June *117

Conveyors

Accurate pneumatic conveyor feeding (e) .....June *131
Belt-conveyor return idler (e)...July *89
Conveyor has fast-change sections (e) .....Dec *117
Conveying-timing unit (e).....Aug *127
Device mounted on conveyor cleans belt (e) .....Oct *119
Endless conveyor for advertising (e) .....July *85
Fillet breading now mechanized..Oct *145
Fresh-frozen chicken quality assured by applying latest equipment. A. V. Gemmill .....Apr *120
Gloucester, Mass. seafood packer finds mechanized handling improves quality .....Nov *61
Meat boning increased by conveyor line .....Mar *94
Modern materials handling report. F. W. McCarthy .....Mar *107-118
Oscillating conveyor (e).....Oct *129
Pneumatic conveyors at corn and soybean plant. E. O. Crawford..Feb *76
Power belt conveyor can be rolled from one job to another (e)..Mar *151
Power feeder (e) .....Sept *131
Roller-bed trailer speeds handling of palletized goods. I. C. Miller....Oct *105
Roller curve for conveyors (e). Dec *121
Speedier butter packaging.....Dec *80
Sugar handling by conveyor in confectionery plant .....Feb *130
System provides added safety for overhead carriers (e) .....Nov 109
Telescoping conveyor (e).....Jan *100
Tip-free carrier bends horizontally, vertically (e) .....Oct *123

Cooking

Cooked foods delivered daily to company outlets by Sander Inc. J. V. Ziemba .....Sept *90
Infra-red continuous broilers make meat balls better for canning. Ray Bloomberg .....Oct *91
Mix-cooker (e) .....Feb *156
Mix-cooker has draw-off valve (e) .....July *97
Cooling unit, water or brine (e).....Sept *127

Corn

Adding brine to kernel corn.....Sept 180
Corn steepwater treated to recover phytin (P) .....Apr 192
Fritos and Cheetos corn chips flow sheet .....Apr *154
Fritos—corn chips—"from scratch—to $15,000,000". Bill Crow Jr...Apr *102
Wet corn mill house. Bishop & Dustin .....Mar *121

Corrosion

Action of alkaline solution on glass surfaces (A) .....Sept 175
Corrosive inhibitant is non-toxic (e) .....June 117
Enameled tin-plated covers corroded by electrolysis (A) .....July 140
New flooring material resists acids (e) .....Nov *119

Costs

Cell and seawater chlorination cuts fish plant sanitation costs. J. V. Ziemba .....July *42
How to reduce the size of the maintenance item in the manufacturing budget. H. L. Dunker.....May *129
New streamlined process economized mass output of fried pies to maintain popular prices. G. W. Massey .....Sept *86
Steam utilization saves thousands of dollars in fruit juice processing. B. L. Skinner.....July *40
Counter—Records every package accurately (e) .....June *125
Coupling, dihedral (e).....Apr *145
Two-piece (e) .....May *107
Cranberry sauce—how to make it....Aug 182
Cream see Milk

D

Dairy Equipment

Liquid caustic system cleans dairy equipment. George Griffel.....Jan *113
Midwest dairy tests pasteurizers and all controllers to avoid shutdowns. W. O. Whitney.....June *75
National Dairy Research Laboratories. A. V. Gemmill.....Jan *61
Permanent pipelines cut cleaning costs at dairy. Fleischman & Holland .....Nov *58
Permanent pipelines for dairy plants (A) .....Nov 169
Permanent welded pipelines successful in dairy engineering. C. R. Havighorst .....Sept *74
Dock board slippage curbed by lock (e)
Steam muffler cleans evaporator tubes faster at Danish Creamery Assn, George Smith.....Oct *101
World's most modern dairy. A. V. Gemmill .....July *60

Dairy Products

Acidity of cream continuously checked, neutralizer added as needed. L. E. Slater.....Sept *98
National Dairy Research Laboratories. A. V. Gemmill.....Jan *61
Refrigerated trucks speed canned whip to market .....June *114
Robichaux continuous neutralization system .....Sept *99
Yogurt demand up (N).....Oct 196
Dairy products see also Butter, Eggs, Milk

Defense

Butter Institute forms mobilization group (N) .....Feb 188
How to get special DO rating for new equipment. F. K. Lawler..Apr 152
"How will mobilization affect my company?" Auren Uris.....Jan *40
Make yourself heard in Washington quickly (ed.) .....May 120
Where food processors stand in emergency. F. K. Lawler.....Feb 71
Dehumidifier, portable (e) .....July *95

Dehydration

Air circulation during drying speeds moisture tests (A) .....Oct 180
Borden's new spray dried cheese..Nov *76

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Canned dried milk products guarded by quality control. Becker & Becker ..... Nov *90
Costs and methods for pig-stock apples. V. F. Kaufman (tables) Dec *97
Dried buttermilk improves bread loaf volume (A) ..... Aug 169
Dried egg moisture content reduced by quick cooling (P) ..... Aug 169
Dried milk—flavor and keeping quality influence by preheat temperature (A) ..... Aug 169
Dried vegetables improved by hot water immersion (P) ..... Apr 195
Dry fruit powder papaya. King, Sakanashi & Song ..... Sept *147
Dry milk yield protein (A) ..... June 178
Dryer for small dairies (e) ..... Mar *153
Drying unit (e) ..... Oct *116
Grade A milk powder—process and equipment. Ritchie & Smith Apr *110
Heater with close limit regulation (e) ..... Aug *118
New dehydration process for starchy foodstuffs (P) ..... June 182
Scrubber-dryer (e) ..... Dec *123
Demineralizer operates from water tap (e) ..... Sept *125

Desserts

Decorations in 5 colors ..... May *150
Gelatin dessert formula ..... Sept 181
New, quick, cold-water dessert mix. Shepherd, McCready & Owens July *44
Sifting free-flowing dessert powder from cartons ..... Oct 188
Sifting out of dessert powder. W. J. Cupo ..... Nov 179
Dextran, a blood plasma substitute (N) ..... Nov 190
Dextrine—Preventing burn-on in converting wheat-meal solution by diastase into dextrine (Q) ..... Apr 207
Deck board slippage curbed by lock (e) ..... Oct *123
Dolley eases movement of palletized loads (e) ..... Oct *127
Door, rubber-swinging (e) ..... Dec *129
Drives—flexible d.c. electronic drives. G. C. Dodson ..... May *97

Drums

Canned dried milk products guarded by quality control. Becker & Becker ..... Nov *90
Fiber drum package (e) ..... July *85
Machine cleans metal drums ..... May *113
Plastic drum liners (e) ..... Sept *127
Purifier delivers vapor with low total solids (e) ..... Nov *111
Washable drums, pails with polyethylene lining (e) ..... Aug *122
Dry free-flowing materials divided into two streams by machine (e) ..... Feb *153
Drying stored grain (P) ..... Nov 173
Duct size reader (e) ..... Jan *101

Dust

Compact dust controller operates independently (e) ..... Sept *117
Dust collector (e) ..... Feb *156
Dust removal and air sterilization in brewery means better products ..... Feb *75
Roof filters protects air machines. W. A. Reed ..... Jan *114

E

Eggs

Acidifying methods extend storage life (A) ..... July 138
Consumer frozen-egg pack. A. R. Winter ..... Feb *86
Controlled yeast-fermentation improves dried egg whites (A) ..... Jan 136
Egg powder keeps longer when packed in CO_2 (A) ..... Nov 175
Moisture content of dried egg reduced by quick cooling (A) ..... Aug 169
Electric oven benefits cited by baker. J. M. Bemis ..... Feb *124
Electrical contact operated by water flow (e) ..... Sept *122
Electrical panels made safer. W. A. Reed ..... Mar *131

Electronics

Automatic statistical control saves on package overfill. Merrill & Hecox ..... May *55
Continuous electronic blanching proved feasible in pilot plant. May *81
Electronic timer (e) ..... July *87
Flexible d.c. electronic drives. G. C. Dodson ..... May *97
Instruments take hold in brewing. L. E. Slater ..... Apr *93
Pillsbury's output of baking mixes controlled by electronic system. L. E. Slater ..... June *80
Elevator adjustable for bottle size (e) ..... Jan *97
Elevator, portable (e) ..... Sept *127
Engines—New tractor diesel engines are faster, use less fuel (e) ..... Nov 104
Enzymes—Fungal enzymes help you make better bread. Johnson & Miller pt 1 ..... Mar *80, pt 2 Apr *161

Equipment

Air compressor—now to get the most out of it. T. G. Hicks ..... July *72
Engineered units for bottling. E. D. White ..... July *78
How to get special DO rating for new equipment. F. K. Lawler ..... Apr 152
Operation Priority ..... Apr 119
Europe—Western Europe food producers learn U. S. markets (N) ..... Mar 177

Evaporation

Evaporator purifiers (e) ..... Apr 135
Low temperature evaporator for lab (e) ..... Jan *94
Pilot evaporator points way to new juice concentrates. Carleton & Curtis ..... Aug *149
Thin-film evaporator concentrates in single pass (e) ..... June *119
Extraction—Solvent extraction saves money in processing cracklings. J. L. Carlson ..... June *102

F

Fan, electric—bars insects from plant. Stokes Homan ..... Sept *9
Faucets—stainless steel that clean fast and easy (e) ..... Sept *123
Feed-water heater (e) ..... Apr *151

Feeders

Dual-feeder (e) ..... Sept *121
Dust-tight vibratory feeder (e) ..... Jan *96
Bottle washer feeder table (e) ..... July *87
Gravimetric feeder for dry chemicals (e) ..... Feb *157
Power feeder (e) ..... Sept *131
Roller mill feeder (e) ..... July *83
Sight feed bubbler (e) ..... Apr *143

Fermentation

Fermentation of palm kernels (A) ..... July 137
Hop extracts exceed value of fresh hops in brewing (A) ..... Oct 179
Malt extract process employs centrifuges (P) ..... Mar 176
Vitamins by fermentation (A) ..... Sept 174
Fiberglas insulation ..... Oct 131

Fillers

Briner fills 70 jars per min (e) ..... Mar 151
Filler eliminates air absorption (e) ..... Feb *155
Jelly filler (e) ..... Aug *121
Milk can filler is automatic. Orr & Kinney ..... Feb *131
Unit fills, seals envelopes (e) ..... Oct *116

Filtration

Air unit filters (e) ..... July 99
Batch filter unit (e) ..... Mar *163
Condense-filter dries compressed air (e) ..... Nov *117
Filter with automatic self-sluicing (e) ..... Jan *101
Glass beads used in new sieve-calibration method assuring more uniform crystal analyses (A) ..... Apr *189
Roof filter protects air machines. W. A. Reed ..... Jan *114
Screen membrane (e) ..... Mar 156

Fire Protection

Dry chemical fire protection system (e) ..... Mar *150
Every employee a fire fighter. Sept *9
Fire fighting unit in portable "package" ..... Oct *119
Gas-type fire extinguisher (e). Mar *157
Photo-electric eyes guard against fires (e) ..... July *97

Fish

Average freezer temperature controls fish quality (A) ..... July 133
Canning and freezing salmon for storing (N) ..... Nov 192
Cell and seawater chlorination cuts fish plant sanitation costs. J. V. Ziemba ..... July *42
Chalkiness in halibut no sign of disease (A) ..... July 133
Continuous freezing towers for packages of fish. Ray Bloomberg ..... Mar *96
Continuous sardine cooker (e) ..... Aug *123
Deep-sea fishing aided by echo sounder (A) ..... Oct 178
Fillet breading now mechanized. Oct *145
Floating plant fillets, cartons, and freezes fish at sea. H. S. Knowlton ..... June *145
Freezing fish at sea to lessen spoilage (A) ..... Aug 179
Frozen breaded shrimps—neophytes set example in food processing (ed) ..... Sept 132
Gloucester, Mass seafood packer finds mechanized handling improves quality ..... Nov *61
How they process quick-frozen trout. C. R. Havighorst ..... Jan *79
Movable shelf retort dries fish quickly (P) ..... Apr 190
Occurrence of vitamin B 12 in fish products (A) ..... Feb 170
Oil extraction from fish livers (A) ..... Mar 173
Pack diced salmon in 4-lb cans. Ray Bloomberg ..... May *93
Ready to cook live lobsters and clams in unique packages ..... Nov *156
Vitamin from fish liquor (A) ..... Oct 172

Flavoring

Canned orange juice flavor not protected by deaeration (A) ..... June 172
Frozen whole milk—preventing oxidized flavor (A) ..... Sept 171
Licorice goes modern ..... July *128
Mixture of glutamates ups food flavors (P) ..... July 138
New flavor evaluation method. D. R. Peryam & others ..... Aug *83
Pasteurized milk cheese speeding flavor development (A) ..... Nov 169
Preventive quality control as shown by Crosse & Blackwell. B. W. Clarke ..... Mar *74
Reverted flavor in soybean oil ..... Aug 183
Sharper flavor ratings of food products through improved profile test. Cartwright & Kelley ..... Sept *71
Small quantities of glutamates improve flavor of beer (A) ..... Sept 174
Solar-activated flavor of homogenized milk (A) ..... Oct 177
Spinach specially seasoned ..... Nov *159
Stabilizing flavor of soybean oil (P) ..... June 177
Turkey meat flavor influenced by feed (A) ..... July 133
Use the fats that fits your mixes. G. T. Carlin ..... July 113

Floods—salvaging Kansas City's flood-hit foods ..... Oct *142
Floors—New flooring material resists acids (e) ..... Nov *119
Concrete floors ..... how to make them ..... how to prepare them. E. E. Ekert ..... Dec *112
Emery aggregate floors (e) ..... Dec *131
Putting and keeping wood floors in shape. J. B. Jassoy ..... Jan *65

Flour

Blueberry muffin mix ..... Mar *167
Flour bin bearing made of nylon (e) ..... Sept *121
Flour from lab conditioner duplicates milled products (A) ..... Dec 167
Frozen strudel dough ..... Aug *163
General Mills' progress. H. A. Bullis ..... June *105
Improved milling procedure gives full-nutrient flour (P) ..... Mar 172
New flour-aging chemical (P) ..... Feb 171
Pillsbury's output of baking mixes controlled by electronic system. L. E. Slater ..... June *80
Prechilling flour employed in cake batters. R. W. Selman ..... Nov 179
Pretzel output multiplied with continuous streightline production. J. L. Dooley ..... July *56
Shortening selection important to prepared mixes. G. T. Carlin. July 113

Flowsheets

Animal shortening processing ..... Aug *136
Aseptic canning ..... June *134
Aseptic canning process ..... Feb *74
Bread making ..... July *103
Brewing flowsheet ..... Dec *88
Chlorinating system ..... July *43
Citrus juice flowsheet ..... Jan *104
Coffee processing from bean to package ..... Oct *134
Continuous marshmallow process ..... July *54
Corn mill flow diagram ..... Mar 122
Dry cracklings extraction process ..... June *104
Grade A milk powder photo-diagram ..... Apr *111
How bakers yeast is made ..... May *122
How Fritos and Cheetos are made ..... Apr *154
Mechanized apple butter and jelly lines ..... Mar *138
Mechanized apple-slice and sauce lines ..... Feb *136
New tell-all flow sheet for beet sugar plant ..... Nov *122
Pillsbury prepared-mix plant ..... June 88
Post Toasties flowsheet ..... Nov *74
Potato chips—making quality chips ..... Dec *134
Powdered shortening process ..... Aug *103
Reich mechanized continuous process for jams and jellies ..... Sept *134
Robichaux continuous neutralization system ..... Sept *99
"Stepfreeze" process for citrus juices ..... Oct *69
Sterilized fresh canned milk processing ..... June *74
Sugar byproducts utilization ..... Aug *145
Sugar flowsheet by the Elguanite process ..... Jan *59
Welded pipeline layout for dairy ..... Sept *75

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Food and Drug Administration

Chemicals controversy scorches industry (ed).....Dec 132
Food, Drug & Cosmetic Act—proposed amendments Jan 51 (ed), Jan 89 (ed).....Feb 125
More "Chemical" hearings (N)..Aug 188

Food Engineering

Food Engineering new name for Food Industries.....Mar 182
1951 award to Anderson's Foods June *67 (N).....Aug *188
Why Food Industries becomes Food Engineering. F. K. Lawler.....Apr *87

Food Engineering Reports

Bakers yeast—unique product. F. W. Nordsiak.....Feb *101
Emergency packaging.....Apr *123
Lighting the food plant. W. H. Kahler.....Aug *105
Modern materials handling.....Mar *107
Newest citrus juice plant. Hopkins & Walker.....Jan *67
Power—buy it? or make it? C. W. Bloedorn.....May *75
They call it the world's most modern dairy. A. V. Gemmill.....July *60
Top efficiency attained by 4-pt advanced engineering. Browning & Havighorst.....Nov *93
Food Engineering Index.....Jan 8, Feb 8, Mar 9, Apr 215, May 181, June 203, July 159, Aug 187, Sept 185, Oct 195, Nov 187, Dec 186

Freight Cars

Device protects goods, curbs load shifts (e).....June *115
Rejuvenating cars with asphalt-laminated paper.....July *7
Telescopic car loader (e).....Dec *115
Froth losses prevented by silicones. T. A. Kauppi.....Jan *44

Fruit Juices

Apple juice oxidation (A).....Dec 168
Canned orange juice flavor not protected by deaeration (A).....June 172
Citrus canners solve waste problems and recover solids. C. E. Wright.....Sept *107
Citrus juice concentration by freezing advanced by engineering. F. K. Lawler.....Oct *68
Citrus juice flowsheet.....Jan *104
Concentrated citrus juice plant features advanced processing technics. Hopkins & Walker.....Jan *67
Concentrating fruit juices without loss of flavor (P).....Apr 195
Frozen apple concentrate (A).....May 159
Frozen concentrated pineapple juice.....Aug 163, (N) Oct 195
Knouse Foods Cooperative makes big strides in apple processing. J. V. Ziemba.....Feb *111
Lime products canned.....June *166
New concentrated citrus plant (N).....Apr 223
New moisture test gives faster results. E. F. Potter.....Jan *85
Orange concentrators face tough cost-price problems. C. E. Wright.....Feb 109
Orange juice free oxidation (P).....Mar 171
Pilot evaporator points way to new juice concentrate. Carleton & Curtis.....Aug *149
Pineapple juice constituents subject to great variations (A).....Sept 169
Steam utilization saves thousands of dollars in fruit juice processing. B. L. Skinner.....July *40
Temperature during handling and storage influence quality of citrus concentrates (A).....Sept *169

Fruits

Byproducts from citrus wastes (P).....Nov 171
Canned fruit set aside for defense use (N).....July 162
Citrus fruit—pink grapefruit concentrate (A).....July 145
Citrus fruits treated with liquified gas for de-greening and preventing decay. C. E. Wright.....June *88
Compounds of chlorine stop final decay of fruits and vegetables (P).....Aug 172
Curbing discoloration of fruit...Oct 190
Dates, packaged.....Mar *166
Dry fruit powder from papaya. King, Sakanashi & Song.....Sept *147
Electronic lemon sorter (N).....Sept 192
Frozen citrus purees developed by new method in Pasedena, Calif. J. S. Lawless.....Mar *100
Frozen mangos with lime.....July *130
Fruit and vegetable slices firmed by calcium salts (P).....Aug 171
How frozen concentrate biochemists are working out the fruit bugs. C. G. Beisel.....Nov *82
Improved air circulation speeds fruit cooling (A).....Aug 172
New moisture test of fruit purees and concentrates. E. F. Potter...Jan *85
New York pier keep perishables cool by conversion of blower units from heating to cooling cycle.....Feb *84
Packaging berries for freezing by synchronized filling line improves output and quality. Fred Granger Jr.....Oct *82
Preservative coating aids fruit canners (e).....Nov *119
Prevents leakage of juice during fruit freezing (P).....Mar 171
Prunes, canned—moisture content controls mold development (A).Oct 171
Quality peeling sets new pace.....Dec *108
Sulfur dioxide treated fruits not to be used for jams and jellies..Sept 180
Vitamins in citrus peels.....Nov 181
Washington State's Cashmere Fruit Growers' improve cold storage by improving warehouse.....Mar *89

G

Gages—Geiger counter gage measures tin plate (e).....Sept 127
Gas—Citrus fruits treated with liquified gas for de-greening and preventing decay. C. E. Wright.....June *88
Soybean oil extracted in inert gas, easing insurance requirements.Jan *88
Gas-flame burner (e).....Feb *153
Generator, steam turbine (e).....Mar 150
Glass—fast way to cut safety glass..Mar *122

Glass Containers

Enameled tin-plated covers corroded by electrolysis (A).....July 140
Olives arranged on trees in bottles.....July *75
Puts permanent code in jar caps. W. A. Reed.....Nov *11
Report on emergency packaging.....Apr *123–134
Glue—Boil-proof.....Oct 131
Visco-Mat converts adhesives to liquid glue (e).....June *123
Gluer, continuous automatic-feed (e).....Feb *148
Glycol—Solubility of sucrose in glycol varies with water content (A).Aug 174
Goggles—Rubber frame goggles are gas tight (e).....Dec 121
Goggles, safety (e).....Feb *152

Grain

Barley identification (A).....Jan 134
Drying stored grain (P).....Nov 173
Grain car sampling simplified. H. D. Bahrenberg.....Nov *9
Nylon-covered thermocouple takes bin temperatures.....July *51
Pneumatic conveyors at corn and soybean plant. E. O. Crawford.Feb *76
Granulator, oscillating (e).....May *117
Grinding—Nitrogen technic assures fine grinding. Gerard Miller.....July *36
Packaged feed plant easy to install (e).....Nov 105

H

Hawaii—Powder clarifier recovers more sugar. R. E. Berg.....Jan *58
Heat exchanger (e) Apr *149 (e) May *119 (e).....Dec *125

Heaters

Blower units converted from heating to cooling units keeps perishables cool on N. Y. pier.....Feb *84
Dielectric heater blanches vegetables continuously in pilot plant....May *81
Electrical heat-transfer units (e).....Sept 131
Gas space heater, externally-mounted gives truck cargo safer warmth.Dec *149
Heater with close limit regulation (e).....Aug *118

Hoists

Adds link chain (e).....Feb *150
Electric chain (e).....July 89
Modern materials handling report. F. W. McCarthy.....Mar *107–118
Holdback, roller (e).....Mar *157

Homogenizing

Batch weighing of white bread banished by new homogenizing twist. Anderson & Mullen.....Oct *67
Homogenizer at low-pressure (P).Mar 175
Homogenizer — unique and sanitary (e).....Aug *117
Hops, dried, moisture measured (e) Mar *164
Horseradish — Potassium metallsulfite keeps horseradish fresh. L. L. Davis.....Oct *113
Humidifier, compact (e).....July *93
Hydrogenator—New agitator for fast job (e).....June *125

I

Ice Cream

Bulk-carton holder saves dipping time (e).....July *99
Buttermilk builds better ice cream.....Mar *90
Fast continuous hardening makes beter ice-cream. C. R. Havighorst.....May *72
Gas-packed ice cream mix.....Aug *164
Ice cream layer cake in novel containers (P).....Mar 174
Ice cream and other small-volume items delivered daily to company outlets by Sanders Inc. J. V. Ziemba.....Sept *90
Improved wrapping operation seals ice cream-stick, too. A. V. Gemmill.....Oct *87
Installation of still minimizes oil problems in freezers.....June *11
Licorice-flavored ice cream.....July *128
Machine reduces solid ice cream to soft (P).....Feb 173
New Jersey coconut plant is built to product. R. J. Boddington.....Nov *68
Sonic method controls air in ice cream (P).....Apr 191
Standard hearings in progress (N) Feb 185.....(N) Mar 192, June 217
Infra-red continuous broilers make meat balls better for canning. Ray Bloomberg.....Oct *91

Insecticides

Insecticide-paint mix (e).....Nov 119
Meat-processing units displayed at A. M. I.....Nov *78
Inspecting cans with crystal x-ray device (e).....Apr *135

Institute of Food Technologists

Annual convention at New York.Aug *87
Instruments — Houston Show — instruments on parade.....Nov *64
Insulation—Silicones applied in numerous ways. T. A. Kauppi.....Jan *44

J

Jams and Jellies

Detection of pectin adulteration in jams and jellies (A).....Nov 171
Gelatin dessert formula.....Sept 181
Jelly filler (e).....Aug *121
Knouse Foods Cooperative makes big strides in apple processing. J. V. Ziemba.....Feb *111
Mechanized apple butter and jelly lines flowsheet.....Mar *138
Mechanized continuous preserving process pays six extra benefits. J. C. Miller.....Sept *103
Preventive quality control as shown by Crosse & Blackwell. B. W. Clarke.....Mar *74
Reich mechanized continuous process for jams and jellies.....Sept *134
Set of pectin jellies (A).....June 171
Sulfur dioxide treated fruits not to be used for jams and jellies....Sept 180
10 changes in preserve operation perks up process performance at Mitchell Syrup & Preserve Co. J. V. Ziemba.....Aug *70
Joints—Compact revolving joint (e) June *121
Universal (e).....Mar *162

K

Kettles—Mix-cooker has draw-off valve (e).....July *97

L

Labeling

Label redesign: don't ignore the labeler. E. K. Graves.....Jan *78
Mail-meter rigged as labeler cuts costs for cookie firm. I. C. Miller.....Dec *141
Movable device simplifies label needs (e).....Nov 109
Redesigned labels on fruit and vegetable cans (e).....Feb *162
Template for effective coding. W. T. Guzie.....Jan *115

Labor

Continuous marshmallow production proves bonus process. Lancaster, Wing & Kessler.....July *53
"How will mobilization affect my company?" Auren Uris.....Jan *40
Lighting the food plant properly ups output, quality and employee relations. W. H. Kahler.....Aug *105
New performance through human engineering.....Oct 74

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Prepare to meet serious manpower shortage, F. K. Lawler ..... Jan 39
Quantities of food one hour of factory labor will buy (chart) ..... July *160
Short cuts in packing ace workers, J. S. Walters ..... Dec *89
Technologists should keep an eye on the labor-relations angle (ed.) ..... Feb 126
Wage minimums set in three branches of food industry (N) .. Feb 195
Work simplification training for Bowman Dairy workers R. A. Baer ..... July *76
Lactic acid—Accurate lactic acid test (A) ..... Nov 172
Lactic acid from potatoes (A) ..... Feb 169

Law and Legislation

Food, Drug & Cosmetic Act—proposed amendments Jan 51 (ed.) Jan 89 (ed.) ..... Feb 125
"Just-in-case" tips on condemnations, Winston & Winston ..... Oct *81
Ten higher court decisions involving food manufacturers, L. T. Parker ..... Mar *84
Leak detector (e) ..... June *131
Lemon powder ..... May 151

Lights and Lighting

The better they see the better the product, V. A. Lennon ..... Oct *72
How light discolors meat; what to do about it, Ramsbottom, Goeser & Shultz ..... Feb *120
Lighting the food plant—report, W. H. Kahler (charts & tables) ..... Aug *105
Planned lighting maintenance, R. M. Smart ..... Feb *96
Lima beans—Canned standards revision ..... June 218
New shear-press predicts quality of canned limas, Amlhud Kramer & others ..... Apr *112
Liquefier of frozen ingredients (e) .. Jan *92
Liquids—Stable foods in liquid form .. Aug *160
Loader handles 36-in. wide pallets (e) ..... Oct *129

Lobsters

Delivered alive in trucks ..... Feb *118
Lobster delicacies ..... June *163
Ready to cook live lobsters and clams in unique package ..... Nov *156

Lubrication

Better machine lubrication with steam engine force lubricators, W. A. Reed ..... Sept *7
Grease rig is portable (e) ..... Mar *149
Hand spray used to apply oil, Howard Miller ..... Feb 132
Lubricating grease, non-melting (e) ..... Dec 131

M

Macaroni—Engineered non-stop output at La Rosa's plant, J. V. Ziemba ..... May *66
Machines—Wise management explains how work saving makes jobs (ed.) ..... Jan 90
Maintenance—making most of maintenance, H. L. Dunker ..... May *129
Malt extract process employs centrifuges (F) ..... Mar 176

Management

Leadership: a new slant, Auren Uris ..... Sept *69
Management must raise its profit sights to pay for progress (ed.) ..... Jan 89
Manometer, kinetic (e) ..... May *104

Margarine

Color in oleo evaluated (A) ..... Nov 170
Oleomargine pats ..... Apr *182
Picayune restrictions bother margarine manufacturers (ed.) .... Jan 90

Marketing and Distribution

Australian beef takes to the air. Feb *110
Beer by tank trucks (A) ..... Nov 174
Bin-handling of drys proves profitable ..... Sept *83
Buy trucks or lease them? ..... Nov *135
Consumer frozen-egg pack, A. R. Winter ..... Feb *80
Conveyor flooring on vehicle speeds handling of palletized goods, I. C. Miller ..... Oct *105
Distilled water company loads faster by palletizing, using aluminum fixtures, James Joseph ..... Jan *84
Insulated frozen-food shipper needs no ice ..... Mar *138
Kraft zones its distribution ..... Mar *87
Lobsters delivered alive in trucks. Feb *118
Michigan Sugar Co. economized by using common carrier in trucking of liquid sugar ..... Sept *149
Operation quality: it shows how better foods will win a widespread market, Park & Miller ..... Oct *94
Orange concentrators face tough cost-price problems, C. E. Wright ..... Feb 109
Pacific Intermountain Express also loads the tractor ..... Mar *125
Pushbutton truck door steps up milk deliveries ..... July *115
Refrigerated trucks speed canned-whip to market ..... June *114
"Rough riding" unit charts truck's cooling efficiency for frozen-products ..... Aug *151
Sanders Inc. produces host of small-volume items for daily delivery to company outlets, J. V. Ziemba. Sept *90
Stokely-Van Camp coordinated expansion secures top-label foods at low cost, A. J. Stokely ..... Aug *80
Marking—Unit puts spot-registered imprints on cartons (e) ..... Dec *119

Materials

Materials and equipment shortages as of April 5, 1951 (table) .... May 137
Operation Priority ..... Apr 119
Quick action needed on materials requirements, F. K. Lawler .... Mar 73

Materials Handling

Better handling and production through vertical storing methods at Morton Salt Co. H. S. Squibbs. Aug *143
Bin-handling of drys proves profitable ..... Sept *83
Borden solves problem of moving them by big millions ..... Dec *71
Boston meat plant builds 1951 efficiency with engineering, J. V. Ziemba ..... Apr *105
Canner improves processing by better vegetable handling, tools, etc. I. C. Miller ..... Jan *86
Confectioner increases output with advanced units and technics, J. V. Ziemba ..... June *96
Conveyor flooring on vehicle speeds handling of palletized goods, I. C. Miller ..... Oct *105
Distilled water company loads faster by palletizing, using aluminum fixtures, James Joseph ..... Jan. *84
Double-hook hoist rig handles long items (e) ..... Aug *133
Engineered non-stop output of macaroni at La Rosa's plant, J. V. Ziemba ..... May *66
Exposition in Chicago ..... June *91
Gloucester, Mass., seafood packer finds mechanized handling improves quality ..... Nov *61
Industrial truck stacker (e) ... Dec *129
Knouse Foods Cooperative makes big strides in apple processing, J. V. Ziemba ..... Feb *111
Miller Brewing Co. modified tractor-shovel does outside jobs quickly ..... Sept *88
Mitchell Syrup & Preserve Co. perks up process performance with 10 changes in preserve operation, J. V. Ziemba ..... Aug *70
Modern materials handling report, F. W. McCarthy ..... Mar *107-118
Palletizing saves all-around, Bernard Schwartzman ..... Apr *100
Pillsbury's output of baking mixes controlled by electronic system, L. E. Slater ..... June *80
Platform lift stacker operates from auto battery (e) ..... Sep *121
Pneumatic conveyors at corn and soybean plant, E. O. Crawford. Feb *76
Power bucket accessory (e) ..... Aug *125
Robot handler automatically stores mechanically loaded pallets (e) ..... Nov 103
Robotizing bakery operations, L. E. Slater ..... Aug *73
Six-can carry home carton and brewer's special unit ..... July *50
Steam utilization saves thousands of dollars in fruit juice processing, N. L. Skinner ..... July 40
Tote-bin handling by unit Jackstacks (e) ..... Nov *115
Unique warehouse brings savings in sugar storing ..... July *46
World's most modern dairy, A. V. Gemmill ..... July *60
You can double output by modernizing, J. V. Ziemba ..... Jan *47

Meat

Armour's prefab meats tap new market with convenient, uniform portions ..... Sept *80
Australian beef takes to the air. Feb *110
Bacon—new lift-the-flap window pack ..... Aug *162
Bacon—quick cure saves 17 days, reduces investment, L. E. Malcom ..... May *60
Bacon smoking unit (A) ..... May 160
Boning operations simplified and output increased by conveyor line Mar *94
Boston plant builds 1951 efficiency with engineering, J. V. Ziemba ..... Apr *105
Deerfood sausage — modernization puts money in your pocket, J. V. Ziemba ..... Nov *85
Desodiumized meat ..... July *128
Determination of nitrate in meat and soil (A) ..... June 182
Effect of storage temperatures on liver-sausage shelf life (A) .. Dec. 167
Frankfurt skinning machine which avoids injury (e) ..... Feb *148
Frankfurters—cook-in-pouch ... July *126
Frankfurter packaging ..... Sept 180
Frankfurter stuffing machine (P) ..... Mar 172
Heat processing effects on sausage-type meats (A) ..... Mar 171
How light discolors meats; what to do about it, Ramsbottom, Goeser & Shultz ..... Feb *120
Improved conveying at lower cost, Thomas Ward ..... Nov *5
Infra-red continuous broilers make meat balls better for canning, Ray Bloomberg ..... Oct *91
Inspection of meat to be extended (N) ..... Mar 192
Longer-life cutting table, Milton Berk ..... Aug *11
Low speed prebreaker (e) ..... July *91
Machine wraps with cellophane (e) ..... Mar *149
Meat processing units displayed at A.M.I. ..... Nov *78
Meat spread in plastic wrap ..... July *129
Packer switches from hydraulic pressing to chemical technic in processing cracklings, J. L. Carlson ..... June *102
Philadelphia meat company re-evaluates its plant equipment, saves dollars, ups quality, Ziten & Evans ..... Oct *147
Pork quality better from rested pigs (A) ..... Jan 191
Pre-slaughtering treatment influences meat quality (A) ..... Dec 167
Process for improving vacuum-canned ground meats (P) ..... July 133
Sausage—Armour's dry sausage department uses old recipes plus new tools ..... June *85
Sausage—microbial growth depends on casing used (A) ..... Nov 170
Sausage packer gages output to meet seesawing sales by production control, W. C. Zinck ..... Sept *141
Scrapple packed in aluminum container ..... Sept *164
Smoked meat product made without casing (P) ..... Jan 130
Tenderizing speeded by new aging process (P) ..... May 150
Thermocouples raise efficiency, slash costs during smoking and cooking operations, Jack Meyer ..... Apr *75
Metabolism of nicotinic acid by humans (A) ..... Aug 174
Metals and growth factors detected by paper chromatography (A) .... May 165

Meters

Compound meter manifold (e) ... Oct *117
Pocket-size pH (e) ..... May *113
Recording mechanism on voltmeters, ammeters (e) ..... Sept *115
Microphotos—with box camera, A. L. Tapel ..... Mar *134

Microscopes

Focusing system improved on lab microscopes (e) ..... Nov *117
Polarizing-microscope query (Q) ..... June 191
Speed your mold counts with this handy grid, P. L. Beach ..... Oct *112

Milk

Adulteration of whole milk detected by tests (A) ..... June 178
Aeration gives low-cost waste disposal, W. A. Hasfurther ..... Feb *90
Canned dried milk products guarded by quality control, Becker & Becker ..... Nov *90
Canned fresh milk, Bloomberg & Hessey ..... June *71
Chocolate milk—to pasteurize more heat or longer hold (A) ..... Aug 169
Cleaning rinse for filled cans, Phillance ..... Feb *130
Concentrated milk makes its debut ..... Mar *165
Cream, non-feathering (P) ..... Jan 125
Determining QAC in milk (A) ..... Sept 172
Dried milk flavor and keeping quality influenced by preheat temperature (A) ..... Aug 169
Dried milk—new flavor evaluation method, D. R. Peryam & others ..... Aug *82
Dried powdered milk vacuum-packaged—oxygen problem ..... Oct 188
Dry milk life upped by ascorbic acid, sodium nitrate (A) ..... Nov 169
Dry milk yields protein (A) .... June 178
Dryer for small dairies (e) .... Mar *153

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Frozen concentrated milk.....July *35
Frozen whole milk—preventing oxidized flavor (A).....Sept 171
Grade A milk powder—process and equipment. Ritchie & Smith...Apr *190
Homogenized milk — solar-activated flavor (A).....Oct 177
Mechanical filler used in Dairymen's League Co-op Assn. N.Y.C. Orr & Kinney.....Feb *131
Testing paper.....Oct 131
Trucks with pushbutton doors steps up milk deliveries.....July *115
Washer handles any size, shape milk bottle (e).....Nov *113
World's most modern dairy. A. V. Gemmill.....July *60
Mills—Fine particle mill produces submicron particles (e).....Oct *115

Mixers

Conical blender (e).....June *131
Mixer provides paste of uniform consistency (e).....July *97
Packaged feed plant easy to install (e).....Nov 105
Swivel mixer (e).....Jan *99
System automatically blends two or more liquids (e).....June *127
Modernization—Deerfoot sausages modernizes with advantage. J. V. Ziemba.....Nov *85
Monoglycerides patents released by Swift (N).....Jan 142
Monosodium glutamates improve flavor of beer (A).....Sept 174
Motor starter (e).....Apr 136

Motors

Compact gear motor doubles torque rate (e).....Oct *117
Drip-proof motor (e).....Jan *100
Explosion proof motor (e) ...Mar *152
Nov *119
FHp motor has high starting torque (e).....Nov 103
Geared motor, fan cooled (e) ....Mar *155
Heavy-duty (e).....Apr *147
How to detect motors leaking to ground.....Apr *9
Motor base easy to make, inexpensive.....Feb *133
Tilting base for fractional horsepower motors (e).....Mar *156
Variable speed motor (e) .....May *103
Vertical motor (e).....Oct 129
Mushrooms packed in various wines.Apr 180

N

National Production Authority

Operation Priority.....Apr 119
Neoprene coating.....May 117
Nitrates—Determination of nitrate in meats and soils (A).....June 182
Nitrogen process—safeguard of quality T. W. Eselgroth.....Dec *72
Noodles—colorful bag.....Oct *161
Nutrition—Vital value of food technology demonstrated in Phillipines (ed.) Jan 89

Nuts

Better kept—better candy. Woodroof & Cecil.....Nov *129
Electronic instrument measures moisture in nuts (e).....Jan *94
Formation of soap deposits in glass jars of vacuum-packed roasted nuts.....Aug 182
Inert gas—safeguard of quality T. W. Eselgroth.....Dec *72
Salted nut shelf life increased by use of butylated hydroxyanisole. Cecil & Woodroof (charts & tables).Feb *81
Sanitary nut breaker (e).....Aug *119
Walnuts in visual-plastic vacuum pack.....June *160

Nuts (metal)

Nuts prevented from loosening ..Oct *11

O

Oils and Fats

Animal fat separation by solvent rendering process (P).....Jan 128
Animal fats treated to prevent spoilage (P).....Jan 128
Animal shortening processing....Aug *186
Bland, odorless lard (P).....July 134
Cottonseed constitutents change as plants grow (A).....May 166
Edible oils from weed seeds (A) Apr 189
Effect of salt and moisture on rancidity of fats (A).....Mar 174
E. Kahn Sons Co.'s advanced refining operations turn out superior animal shortening. I. C. Miller.....Aug *88
Oil extraction from fish livers (A) Mar 173
Peanut oil's catalytic effect upon iron retarded by citric acid (A)....Apr 189
Popcorn oil from tin to glass pack Sept *166
Powdered shortening process....Aug *103
Powdered shortening process at Beatrice Foods Co.—cooperation and success. Alton, Noznick & North.....Aug *102
Pump melts and pumps shortening from barrel into fryer (e).....Feb *154
Reverted flavor in soybean oil....Aug 183
Salted nut shelf life increased by use of butylated hydroxyanisole. Cecil & Woodroof (charts & tables) Feb *81
Soybean oil extracted in inert gas easing insurance requirements Jan *88
Stabilizing flavor of soybean oil (P) June 177
"Superfined" salad and cooking oil Apr 180
Trends bring shifts in baking ingredients. A. B. Paul.....Feb *94
Use the fats that fit your mixes. G. T. Carlin.....July 113
Olives—Packing mechanized.....July *75
Oven—laboratory oven (e).....July 84
Oxygen analyzer (e).....Jan *94

P

Packaging

Air operated vibrator (e).....Nov *111
Aluminum pack for scrapple....Sept *164
Armour's prefab meats tap new markets with convenient, uniform portions.....Sept *80
Automatic statistical control saves on package overfill, Merrill & Hecox.....May *55
Bagging devices prevent dusting when filling with powder. W. A. Reed.....Aug *9
Beer in take-home carton.....Aug *164
Bowman Dairy and Sealright perfect their special carton forming and filling machine. L. E. Slater..May *82
Bulk-carton holder for ice cream saves dipping time (e).....July *99
Chinese dinner for two.....Oct *158
Coffee packaged "regimental" style. J. V. Ziemba.....Mar *102
Counter records every package accurately (e).....June *125
Frozen meals encased in aluminum Nov *156
Gas-packed ice cream mix.....Aug *164
General Foods offers 9 new wrappers. R. de S. Couch.....June 109
Ice-walled package for frozen foods (P).....July 136
Improved wrapping operation seals ice cream stick, too. A. G. Gemmill Oct *87
Inert gas—safeguard of quality. T. W. Eselgroth.....Dec *72
Machine fills frozen foods at 225 boxes a min. (e).....Jan *93
Mail-meter rigged as labeler cuts costs for cookie firm. I. C. Miller Dec *141
Military packaging (table) Grundy & Rubinate.....Sept *111
More "buy-me-again" appeal needed in packaging specialties (ed.) Mar 128
Multi-product packer (e).....Apr *136
New packages and products Jan 116, Feb 162, Mar 165, Apr 180, May 146, June 160, July 126, Aug 160, Sept 162, Oct 158, Nov 156.....Dec 160
Package shows Atlantic City time *110
Paperboard cartons are water and stain-resistant (e).....July 95
Potato chips stay fresh with packet of absorbing and drying agents in sack (table). Miller & Robertson.....July *38
Report on emergency packaging Apr *123-134
Six-can carry home carton with special unit.....July 50
Speedier butter packaging.....Dec *80
Synchronized filling line permits packaging of berries for freezing with improved output and quality. Fred Granger Jr.....Oct *82
Packaging Institute Forum.....Dec *76

Packing

Egg powder keeps longer when packed in CO_2 (A).....Nov 178
Gravity packer handles paper, textile bags (e).....Jan *97
Oil-packing mechanized.....July *75
Sausage packer gages output to meet seesawing sales by production control. W. C. Zinck.....Sept *141
Strapping tool (e).....Aug *123
Packings—Heat-molded (e).....Aug *121
Pallet elevator, portable (e).....July *99
Pallet loader, pushbutton (e).....Feb *150
Pantograph improves cutting odd shapes with a torch. W. A. Reed.....Oct *9
Papaya—Rich powder from papaya. King, Sakanashi & Song.....Sept. *147
Paper chromatography detects impurities (A).....May 165

Pasteurization

Ambrosia Brewing triples output by rapid pasteurizing and speeding sanitation.....Oct *111
Chocolate milk, to pasteurize more heat or longer hold (A).....Aug 169
Midwest dairy tests pasteurizers and all controllers to avoid shutdowns. W. O. Whitney.....June *75
Pasteurized milk cheese speeding flavor development (A).....Nov 169

Peanuts

Aqueous emulsion (P).....July 134
Flavored peanut butter.....Nov *158
Peanut-cheese spread.....Oct *162

Peas

Freezing peas.....Nov 180
New pea-maturity tester.....Sept *143
Pea combine-harvester (e).....Dec *117
Pectin—Detection of pectin adulteration in jams and jellies (A).....Nov 171
Knouse Foods Cooperative makes big strides in apple processing. J. V. Ziemba.....Feb *111
Peeling—quality peeling sets new pace Dec *106
Peracetic acid a new bastericide-fungicide.....Oct 131

Pest Control

A & P Tea Co engineers rigid quality control system for candy products. J. V. Ziemba.....Oct *75
Effective rat control with dicomarin (A).....Sept 172
Fans keep flies out.....Jan *115
How effective is warfarin in curbing rodents in food plants? D. H. Little Aug *69
Insecticide-paint mix (e).....Nov *119
Proper raw-material inspections. J. C. Dawson.....May *91
Starch dusting brings 4 benefits. J. C. Dawson.....Apr 5
Way to foolproof sanitation. J. C. Dawson.....Feb *99
Phytates will stop cherry discoloration. Cohee & Nelson.....Mar *91
Phytin recovered from corn steepwater (P).....Apr 192

Pickles

Brimer fills 70 jars per min. (e) Mar *151
How a few easy to use tank markers solve brine makeup problems. D. W. Kaufmann.....Dec *108
Pickled pineapples.....Nov *160
Vacuum-packed pickles.....Mar 167
Pineapples—Pickled.....Nov *160

Pipes

Easy-to-use fittings are liquid tight pipes (e).....Nov 104
Permanent pipelines cut cleaning costs at dairy. Fleischman & Holland.....Nov *58
Permanent pipelines for dairy plants (A).....Nov 169
Permanent welded pipelines for dairy engineering. C. R. Havighorst Sept *74
Pipe fittings, corrosion resistant (e) Apr *143
Stainless steel fittings (e).....Aug *129

Plant Layout

Chickens fresh-frozen in Georgia plant.....Apr *120
Citrus juice plant at Fullerton, Calif. Jan *69
Hamm's Brewing Co. layout....Aug *92
Supplee's dairy plant.....July *63
Polyethylene—Report on emergency packaging.....Apr. *123-134
Popcorn—Complete popcorn kit.....Oct *161
Posters sell workers on cleanliness...Jan *54
Potassium metabisulfite keeps horseradish fresh. L. L. Davis.....Oct *113

Potatoes

How to preserve pre-peeled potatoes being shipped in moisture-proof bags (Q).....June 191
Lactic acid from potatoes (A)...Feb 169
New dehydration process for starchy foodstuffs (P).....June 182
Potato chips—making quality potato chips flowawheet.....Dec *134
Potato chips stay fresh with packet of absorbing and drying agents in sack (table). Miller & Robertson.....July *38
Potato chips—they engineered farm-to-family quality. I. C. Miller..Dec *95

Poultry

Against hormone diet (N).....July 159
Fresh-frozen chicken quality assured by applying latest equipment. A. V. Gemmill.....Apr *120
Frozen turkey—midget-size.....Aug *160
Turkey meat flavor influenced by feed (A).....July 133
Wild game products.....Apr *182
Power—Buy it? or make it? C. W. Bicedorn.....May *75
Prebreaker, low speed (e).....July 91
Prices—Facts of price spreads.....Apr 215
Supply the antidote for that price poison (ed).....July 100
Printing shipping cases as they are needed.....Feb *117

Processed Apples Institute, Inc organized (N) ....Oct 198

Production Control

Lighting the food plant ups output, quality, sanitation, employee relations. W. H. Kahler....Aug *105
Pretz-l output multiplied with continuous straightline production. J. L. Dooley....July *56
Restyling byproducts will add new income—U. S. Dept. of Agric. shows sugar industry how....Aug *144
Sanders Inc. produces host of small-volume items for daily delivery to company outlets. J. V. Ziemba. Sept *90
Sausage output gaged to meet see-sawing sales. W. C. Zinck....Sept *141
Stokely-Van Camp coordinated expansion secures top label foods at low cost. A. J. Stokely....Aug *80
Why output will go up (chart)...July *111
Profits—High-profit claims fade under probe of canners (charts & tables). J. A. J. Jones....Aug 112
Prunes, vacuum packed....Mar 165
Public relations—Hawaiian Pineapple Co. reports to stockholders (N)...Feb *181
Pulverizer—Pilot-plant pulverizer (e) ....Dec *119

Pumps

Bung bushing barrel pump (e)...Apr *139
Centrifugal pump melts and pumps shortening from barrel into fryer (e)....Feb *154
Electrifugal pump and motor (e)....Jan *98
Laboratory pump does not touch liquid (e)....Feb 157
Proportions six liquids (e).....May *115
Pump-meter (e)....Jan 100
Screw pump for positive displacement of viscous liquids (e)...May *111
Shaft-seal (e)....Mar 149
Small centrifugal pump (e).....Oct *123
Vertical high pressure pump (e). July *93

Q

Quality Control

Accurate lactic acid test (A)...Nov 172
Acidity of cream checked continuously, neutralizer added as needed. L. E. Slater....Sept *98
Ascorbic acid, sodium nitrate ups life of dry milk (A).....Nov 169
A & P Tea Co. engineers rigid quality control system for candy products. J. V. Ziemba.....Oct *75
Bakers yeast—unique product. F. W. Nordsiek....Feb *101
Beverage quality and how to assure it (tables). S. S. Epstein....Sept *100
Buttermilk builds better ice cream Mar *90
Coca-Cola operates 21 mobile labs to check quality. A. V. Gemmill. May *63
Cooperation at Beatrice Foods Co. makes powdered shortening process a success. Alton, Noznick & North....Aug *102
Detection of pectin adulteration in jams and jellies (A).....Nov 171
Doughnuts of quality—1,700 doz. an hour. Zenas Block.....Jan *55
Drake Bakeries produce better quality cakes with new processes. Ward & Hackett.....Oct *102
Engineer better quality into your products (ed)....July 100
Fresh-frozen chicken quality assured by applying latest equipment. A. V. Gemmill....Apr *120
Fritos—corn chips "from scratch—to $15,000,000." Bill Crow Jr...Apr *102
Glass baffle balks air, betters beer. A. C. Sm'th....Jan *52
Gloucester, Mass. seafood packer finds mechanized handling improves quality....Nov *61
Host of small-volume items for daily delivery to company outlet produced by Sanders Inc. J. V. Ziemba....Sept *90
How they process quick-frozen trout. C. R. Havighorst....Jan *79
Inert Gas—safeguard of quality T. W. Eseigroth....Dec *72
Lighting the food plant properly ups output, quality, sanitation, employee relations. W. H. Kahler. Aug *105
Mechanized continuous preserving process pays six extra benefits. I. C. Miller....Sept *103
New flavor evaluation control for dried milk. D. R. Peryam & others....Aug *83
Nitrogen technic assures fine grinding. Gerard Miller.....July *36
O2 below 0.2 system guards quality status quo at dairy. Becker & Becker....Nov *90
Operation quality: it shows how better foods will win a widespread market. Park & Miller.....Oct *94
Packaging berries for freezing by synchronized filling line improves output and quality. Fred Granger Jr....Oct *82
Phytates will stop maraschino cherry discoloration. Cohee & Nelson. Mar *91
Pillsbury's output of baking mixes controlled by electronic system. L. E. Slater....June *80
Pneumatic conveyors at corn and soybean plant. E. O. Crawford. Feb *76
Post Toasties gets uniformity-plus in high volume production. L. E. Slater....Nov *71
Potato chips—they engineered farm-to-family quality. I. C. Miller. Dec. *95
Preventive quality control: it spots substandard products in time to act. B. W. Clarke....Mar *74
Quality of bread from quick-frozen dough (A)....Oct 171
Reduction in pH of batter improves cake quality (A)....Sept 170
Salted nut shelf life increased by use of butylated hydroxyanisole. Cecil & Woodruff (charts & tables)..Feb *81
Shear-press predicts quality of canned limas. Amihud Kramer & others....Apr *113
Stokely-Van Camp coordinated expansion secures top label foods at low cost. A. J. Stokely....Aug *80
Synthetic can linings for protection. S. L. Flugge....Aug *114
Teaming of engineering and control assures expansion tuned to quality at Theo. Hamm Brewing Co. Lang & Wooley....Aug *92
Temperature during handling and storage influence quality of citrus concentrates (A)....Sept *169
Thermocouples reduce smoking time of meats, slash costs. Jack Meyer Jan. *75

Quick Freezing

Bacterial count in vegetables reflects plant conditions (A).....Mar 175
Canning frozen salmon (A).....Sept 169
Citrus juice concentration by freezing advanced by engineering. F. K. Lawler....Oct *68
Citrus juice flowsheet....Jan *104
Consumer frozen-egg pack. A. R. Winter....Feb *80
Consumer-pack frozen foods by Borden Co....Oct *158
Fillet breading machanized....Oct *145
Fish continuously frozen in towers. Ray Bloomberg....Mar *96
Fish frozen at sea to lessen spoilage (A)....Aug 179
Floating plant fillets, cartons, and freezes fish at sea. H. S. Knowlton June *145
Freezer doors of plywood (e)....Jan *99
Freezer wrap....Nov *161
Freezing peas....Nov 180
Freezing: Quick-coordinated....June *160
Fresh-frozen chicken quality assured by applying latest equipment. A. V. Gemmill....Apr *120
Fresh strawberry caps removed by freezing (P)....Feb 169
Frozen apple concentrate (A)...May 159
Frozen breaded shrimps—neophytes set example in food processing (ed)....Sept 132
Frozen citrus purees developed by new food lab. Pasadena, Calif. J. S. Lawless....Mar *100
Frozen concentrated milk....July *35
Frozen food growth is striking..May 59
Frozen mangos with lime....July *130
Frozen meals encased in aluminum foil....Nov *156
Frozen strudel dough....Aug *163
How frozen concentrate biochemists are working out the fruit bugs. C. G. Heisel....Nov *82
How they process quick-frozen trout. C. R. Havighorst....Jan *79
Ice-walled package for frozen foods (P)....July 136
Liquefier of frozen ingredients (e)....Nov *92
Midget-size frozen turkey....Aug *160
Newest citrus juice plant features advanced processing technics. Hopkins & Walker....Jan *67
Orange concentrate face cash cost-price problems. C. E. Wright Feb 109
Packaging berries for freezing by synchronized filling line. Fred Granger Jr....Oct *82
Pre-freezing process insures green color of legumes (P)....May 159
Prevents leakage of juice during fruit freezing (P)....Mar 171
Quality of breads from quick-frozen dough (A)....Oct 171
Rancidity in frozen peas (N)..Sept 186
Rhubarb, frozen (N)....July 162
"Rough riding" unit charts truck's cooling efficiency of frozen foods Aug *151
Seven frozen meats....Mar *168
Temperatures during handling and storage influence quality of citrus concentrates (A)....Sept *169

R

Rabbits—Standards revised....July 173

Railway Cars

Mechanical units heat or chill car..Feb. *146
"Reefer" cars adequate say rail operators (N)....Jan 151
Trackmobile speeds railway car handling....Mar *150
Rats—Urban control of rats (A)...Feb 176
Raw materials—Proper raw-material inspections. J. C. Dawson....May *91
Safeguard your raw materials with sanitary storage areas and you safeguard profits. Dawson & Millard....Sept *67
Recorder, running time (e).....Oct *126
Refining—Superior animal shortening at E. Kahn Sons Co. with advanced refining operation. I. C. Miller. Aug *88

Refrigeration

Aluminum boxes for truck cargoes (e)....Sept *117
Ammeter in freezers improves performance....July *9
Banana production increased by refrigerated 5-room plant, Los Angeles....Nov *141
Buy trucks or lease them?.....Nov *135
Centrifugal refrigerating unit (e)..Apr *151
Circulating refrigerated air cools melted chocolate (P).....Aug 171
Freezer space in truck adjusted to shipment....May *139
Frozen whole milk—preventing oxidized flavor (A).....Sept 171
How to figure refrigeration needs. T. G. Hicks.....Oct *108
Insulated frozen-food shipper needs no ice....Mar *148
Meat processing units displayed at A.M.I....Nov *78
Mechanical units heat or chill cars Feb *146
New York pier keeps perishables cool by conversion of blower units from heating to cooling cycle..Feb *84
Refrigerated gas storage extends life of apples (A).....Oct 182
Refrigerating equipment operates on waste steam (e).....Aug *127
Refrigeration unit cools truck interior (e)....Apr *149
Single compressor does dual job. July *11
Transport cooler uses dry ice (e). Jan *97
Truck gas-refrigerator (e)....Dec *121
Unit provides low temperatures without frost (e).....May *109
Walk-in cooler maintains multiple temperature (e)....Nov 107
Water in refrigerating systems. (A) June 184
Register control for packaging units (e)....Apr *151

Research

Coca-Cola operates 21 mobile labs to check quality. A. V. Gemmill. May *63
General Foods expands its research and makes it pay. R. C. Reeves Feb *85
How light discolors meat: what to do about it. Ramsbottom, Goeser & Shultz....Feb *120
National Dairy's newest center. A. V. Gemmill....Jan *61
New moisture test of fruit purees and concentrates. E. F. Potter. Jan *85
Preventive quality control as shown by Crosse & Blackwell. B. Clarke....Mar *74

Rice

Enrichment of rice reduces beriberi (A)....Mar 172
Parboiling and drying improves milled rice (P).....Feb 173
Standards revised....June 218
Rotor temperature measured by recorder (e)....May 107

Report on emergency packaging ..... Apr *123–134

Shrimps

Enzyme system responsible for black spotted shrimp (A) ..... June 180
Freezing process for shrimps ..... June *160
Sieves, testing, use glass beads of graduated size (A) ..... Apr *189
Sifter, high capacity (e) ..... May *103
Silicones speed, sanitize processes. T. A. Kauppi ..... Jan *44
Sink, floor (e) ..... Apr *140

Sirups and Molasses

Molasses in the manufacture of bakers yeast. F. W. Nordsick ..... Feb *101
Pure syrup from candy trims. Childs & Ciccone ..... July *79
Slicer (e) ..... May *105
Smokeless roaster used by coffee company ..... Nov *133
Sodium nitrate—Ascorbic acid, sodium nitrate ups life of dry milk (A) ..... Nov 189
Soybeans—Reverted flavor in soybean oil ..... Aug 183
Stabilizing flavor of soybean oil (P) ..... June 177

Spices

Liquid spices ..... Aug *160
Liquid spices for home ..... Jan 122
Make your own sauces ..... Nov *160
Spinach—Specially seasoned ..... Nov *189
Stacking—Matzoth production line speeded by weigher-stacker ..... June *94

Standards

Almonds in shell USDA standards (N) ..... Sept 198
Apples for processing USDA standards (N) ..... Oct 207
Bread standards—FDA caught in cross-fire (N) ..... Jan 144
Broccoli standards (N) ..... May 192
Canned grape juice standards revised (N) ..... May 194
Canned lima beans revised (N) ..... Aug 200
Cheddar cheese standards now in effect (N) ..... Feb 191
Cherries, sulfured revised ..... July 170
Cream cheese with other foods (N) ..... Apr 226
Dairy products (N) ..... Aug 200
Dairy products amended (N) ..... Aug 202
Eggs and egg products amended (N) ..... Aug 200
Extracted honey standards revised (N) ..... May 192
F&DA corn standards (N) ..... Sept 197
F&DA evaporated milk standards (N) ..... Sept 197
Frozen Brussels sprouts standards revised (N) ..... May 194
Frozen diced carrots (N) ..... Aug 202
Ice cream standards hearing ..... June 217
"Imitations" are real (N) ..... May 181
Jam standards expected to cut dextrose (N) ..... Mar 177
Lamb standards revised (N) ..... May 192
Lima beans, canned revision ..... June 218
Marmalade, orange ..... July 173
Nonfat dry milk solids revised (N) ..... Aug 200
Oranges revision ..... July 170
Pears for canning USDA standards (N) ..... Oct 207
Pecans in the shell revised (N) ..... Aug 200
Peas (N) ..... Aug 202
Potatoes, canned sweet revised ..... July 173
Poultry revised ..... July 173
Processed fruits and vegetables USDA standards revised (N) ..... Sept 197
Rabbits, domestic revised ..... July 173
Rice standards revised ..... June 218
Salt substitutes not regarded as drugs (N) ..... Apr 225
Shelled almonds USDA standards (N) ..... Sept 198
Shelled white spanish peanuts revised (N) ..... Aug 200
Sugarcane syrup (N) ..... Aug 200
Sweet potatoes for canning (N) ..... Aug 200
Sweet potatoes for dicing or pulping (N) ..... Aug 200
Veal standards revised (N) ..... May 192
Starch—Explosibility of starch dusts (A) ..... Jan. 132
Starch for wheat flour (A) ..... July 134
Statistical control saves on package overfill. Merrill & Hecox ..... May *55
Steam generator (e) ..... June *116
Steam trap (e) ..... Feb *154; Apr. *145
Steel—How to make stainless steel go further is shown by orange drink plant. E. F. Hansen ..... Nov *62
Step-ladder, double (e) ..... Apr *145
Stepladder, safety (e) ..... Oct *127

Sterilization

Aseptic canning soup. C. R. Havighorst ..... Feb *72
Dust removal and air sterilization in brewery means better products. Feb *75
Effect of flash sterilization on color of tomato juice (A) ..... June 171
Fresh milk canned. Bloomberg & Hessey ..... June *71
Machine cleans, sterlizes food bugs (e) ..... Dec *116

Storing

Acidifying methods extend storage life (A) ..... July 138
Average freezer temperature controls fish quality (A) ..... July 133
Borden solves problem of moving them by the millions ..... Dec *71
Canned dried milk products guarded by quality control. Becker & Becker ..... Nov *90
Chocolate spoilage can be minimized (A) ..... Aug 170
Cold-air tunnel cools quicker than cold storage methods (N) ..... May 184
Compounds of chlorine stop final decay of fruits and vegetables (P) ..... Aug 172
Cool storage of canned foods aids ascorbic acid retention—tomato paste (A) ..... Dec 168
Effect of storage temperatures on liver-sausage shelf life (A) ..... Dec 167
Electronic generator prolongs shelf-life of foods (N) ..... Oct *200
Morton Salt Co.'s vertical storing methods means better handling and storing. H. S. Squibbs ..... Aug *143
New York pier keeps perishables cool by conversion of blower units from heating to cooling cycle ..... Feb *84
Nylon-covered thermocouple takes stored-grain temperature ..... July *51
Potato chips stay fresh with packet of absorbing and drying agents in sack (table). Miller & Robertson ..... July *38
Refrigerated gas storage extends life of apples (A) ..... Oct 182
Robot handler automatically stores mechanically loaded pallets (e) ..... Nov 103
Safeguard your raw materials with sanitary storage areas and you safeguard profits. Dawson & Millard ..... Sept *67
Temperatures during handling and storage influence quality of citrus concentrates (A) ..... Sept *169
Underground cold storage warehouse (N) ..... Oct 205
Unique warehouse brings savings in sugar storing ..... July *46
Washington State's Cashmere Fruit Growers' improve cold storage by improving warehouse ..... Mar *99
Strawberries—Fresh strawberry caps removed by freezing (P) ..... Feb 169
"Stream splitter" (e) ..... Feb *163

Sugar

Beet sugar factory attains top efficiency by 4-pt advanced engineering. Browning & Havighorst ..... Nov *93
Conveyor handles sugar in confectionery plant ..... Nov *130
Dextran, a blood plasma substitute (N) ..... Nov 190
Double defecation process improves sugar yield (P) ..... June 177
Flowsheet for beet sugar plant ..... Nov *122
Germicidal lamps curb bacteria on sugar at Canadian refinery. A. F. Blake ..... Jan *77
Powder clarifier recovers more sugar. R. E. Berg ..... Jan *58
Readily made ingredients for bakers, confectioners instead of powdered sugar. R. N. Prince ..... Aug *100
Solubility of sucrose in glycol varies with water content (A) ..... Aug 174
Sugar byproducts utilization ..... Aug *145
Trucking of liquid sugar is fast and flexible ..... Sept *149
Unique warehouse brings savings in sugar storing ..... July *46
U. S. Dept. of Agric. shows sugar industry how better byproducts utilization will add new income ..... Aug *144

T

Tachometer covers wide speed range (e) ..... Aug *131
Tacker—Cuts wiring costs (e) ..... June *117

Tanks

"Fog" unit for sanitizing tanks (e) ..... Feb *158
Purifier delivers vapor with low total solids (e) ..... Nov *111
San Francisco Brewing Co. suspends tanks to equalize foundation pressure ..... Sept *145
Sedimentation tank (e) ..... May *119
Tape, steel, rewinds automatically (e) ..... Jan *99
Tea—Premium with tea ..... Sept *167

Technology

How engineering and technology team up in good food plant operation ..... Apr 91
Shortage of technical men make deferments advisable (ed) ..... Mar 128

Temperature

Accrutem regulator controls process temperature (e) ..... Nov 105
Hand chart "spots" relative humidity (e) ..... Aug 133
Nylon-covered thermocouple takes bin temperature ..... July *51
Specific heat of wheat (A) ..... Oct 180
Temperature recorder (e) ..... Mar *158
Temperature recorder in kettle. June *5
Thermometer
Electronic (e) ..... Apr *136
Time and motion study
Simplified work simplification through special training. R. A. Baer ..... July *76
Titrator, automatic (e) ..... Apr *139

Tomatoes

Effect of flash sterilization on color of tomato juice (A) ..... June 171
Tomato juices—better quality and better yields (N) ..... Aug 188
Tomato paste—cool storage of canned foods aids ascorbic acid retention (A) ..... Oct 168
Tractors—Miller Brewing Co. modified tractor-shovel does outside jobs quickly ..... Sept *88
Tractor device automatically engages trailer (e) ..... Dec *116
Training—Work simplification training for Bowman Dairy workers. R. A. Baer ..... July *76
Transformer with sealed tank (e) ..... Apr *146
Transmissions—Vari-speed transmissions use lower input speeds (e) ..... June *121
Transmitter (e) ..... Oct *127

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Trucks and Trucking

Aluminum boxes for truck cargoes (e) ....Sept *117
Automatic transportation (e)...June *129
Beer by tank trucks (A).....Nov 174
Bin-handling of drys proves profitable .....Sept *83
Borden solves problem of moving them by the millions.....Dec *71
Buy trucks or lease them?.....Nov *135
Clark electric Carloader (e).....Oct *125
Conveyor-flooring on vehicle speeds handling of palletized goods. I. C. Miller .....Oct *105
Cushioned tires on industrial trucks (e) .....Feb *148
Distilled water company loads faster by palletizing, using aluminum fixtures. James Joseph.....Jan *84
Dodge truck line .....Apr *137
Drum or barrel clamp (e).....May *115
Dual-refrigerated custom-built truck body cuts losses in trucking perishables. R. A. Latimer.....Sept 11
Dual-wheels ease lift-truck steering (e) .....Sept 128
Electric fork-lift truck (e).....July *89
"Fenced-in" lift truck does big job. I. C. Miller.....May *133
Fork truck (e).....Mar *158
Fork truck, redesigned, handles loads without pallets (e).....Apr *149
Freezer space adjusted to shipment .....May *139; Correction July 168
Gas-refrigeration for trucks (e).Dec *121
Gas space heater, externally-mounted gives cargo safe warmth....Dec *149
Hand truck (e) .....Dec *123
Hoist-equipped trucks (e).....June *123
Kraft zones its distribution.....Mar *87
Lift truck maintenance (e).....Dec *123
Light trucks (e).....Mar *153
Lobsters delivered alive in trucks.. Feb *118
Magnesium dock board for use with trucks (e) .....June 119
Michigan Sugar Co. economizes by using common carrier in trucking of liquid sugar.....Sept *149
Milk truck body for pallet-loading (e) .....Feb *151
Modern materials handling report. F. W. McCarthy.....Mar *107–118
New lift carriage ups industrial truck's versatility (e).....Nov 107
Pacific Intermountain Express also loads the tractor .....Mar *125
Platform lift-stacker operates on auto battery (e).....Sept *121
Power bucket accessory (e).....Aug *125
Pushbutton truck door steps up milk deliveries .....July *115
Refrigerated trucks speed canned-whip to market .....June *114
Refrigerator unit cools truck interior (e) .....Apr *149
"Rough riding" unit charts truck's cooling efficiency .....Aug *151
Spark-shielded fork trucks (e)..Aug *131
Trailer, stainless steel.....May *107
Truck-trailer has motor under floor Jan *82
Tubes—slide chart for bending of stainless tube (e).....Apr 147
Tubing protected by plastic armor (e) May *111

——U

Ultrasonics in the food field.....May *117
Ultraviolet rays—Dust removal and air sterilization in brewery means better products .....Feb *75

U. S. Army Foods

Emulsifiers improve coatings for Army candy rations (A).....Oct 171
Fortified confections in SA-3 Arctic-survival ration .....Mar *104
Korean troops well fed soldiers (N) July 164
Military packaging (table). Grundy & Rubinate .....Sept *111
Office of the Quartermaster food product requirements (N).....July 162
Vitamin-enriched cereal and cocoa disks for field rations (N).....Oct *206

——V

Vacuum

Canned dried milk products guarded by quality control. Becker & Becker .....Nov *90
Pressure packed cream whip....Oct *141
Walnuts in visual-plastic vacuum pack .....June *140

Valves

Bin valve is dust-tight (e).....May *104
Flow regulating valves (e).....May *119
Jacketed alloy valve (e).....Mar *161
Remotely-operated valve (e)....Aug *121
Solenoid explosion-proof housing for valves (e) .....Aug *121
Surge damping valve prevents shock (e) .....July *91
Valve controls bulk materials flow (e) .....July *87
Y-pattern brass swing valve (e)...Feb *148

Vegetables

Bacterial count in vegetables reflects plant conditions (A).....Mar 175
Compounds of chlorine stop final decay of fruits and vegetables (P) Aug 172
Continuous electronic blanching proved feasible in pilot plant..May *81
Dried vegetables improved by hot water immersion (P).....Apr 195
Fruit and vegetable slices firmed by calcium salt (P).....Aug 171
Preservative gel coating for fruits and vegetables (N).....Aug 187
Quality peeling sets new pace..Dec *106
Vibrator, air operated (e).....Nov *111
Vibrator, semi-noiseless (e).....May *105

Vinegar

Knouse Foods Cooperative makes big strides in apple processing. J. V. Ziemba .....Feb *111
Testing vinegar bacteria (A)..Dec 169
True rapid vinegar bacteria grown on unenriched media (A).....May 158
Wine vinegars in five varieties...May *146

Vitamins

"Candied" vitamins .....Nov *158
Fish liquor source of vitamins (A) Oct 172
How to vitaminize candies. A. E. Leighton pt 1 Mar *104 pt 2..Apr *169
Post Toasties gets uniformity-plus in high volume production. L. E. Slater .....Nov *71
Vitamin B 12 in fish products (A) Feb 170
Vitamins by fermentation (A)..Sept 174
Vitamin color stability (A).....Nov 175
Vitamins in citrus peels.....Nov 181

——W

Warfarin—how effective is it for curbing rodents in food plants. D. H. Little Aug *69

Waste Disposal

Aeration gives low-cost waste disposal. W. A. Hasfurther.....Feb *90
Byproducts from citrus wastes (P) Nov 171
Canner improves processing 8 ways, waste disposal one of them. I. C. Miller .....Jan *86
Citrus canners solves waste problems; save too. C. E. Wright..Sept *107
Flow diverter removes waxes from water wastes (e) .....Nov *113
Gas-fired incinerator (e).....July 91
How west coast brewery solved disposal problem. C. R. Havighorst June *142
Sell that oil in citrus seeds. C. E. Wright .....May 102
Sugar wastes put to a profit (N) Apr 216
Torula yeast grown on spent sulfite liquor (A) .....Feb 171
Washington State Pollution Commission specifies 20-mesh screen for cannery wastes (N).....Mar 188
Waste disposer (e).....July *99
Water supply.—Hill-top reservoir solves water problem for apple products plant .....Nov. *57

Water Treatment

Cell-and-seawater chlorination cuts fish plant sanitation costs. J. V. Ziemba .....July *42
Chlorinator for water (e).....Dec. 131
Deionizer for water (e).....Jan *93
Demineralizer keeps constant check on water purity (e).....June *119

Wax—Cheese-coating goes continuous with belt-line technic. L. E. Slater Oct *92
Waxes removed from water wastes by flow diverter (e).....Nov *115

Weighing

Automatic statistical control saves on package overfill. Merrill & Hecox .....May *55
Batch weighing of white bread banished by new homogenizing twist. Anderson & Mullen.....Oct *67
Crane scale (e).....Mar *159
Device converts old-fashioned scale to "automatic" (e).....June *127
Matzoth production line speeded by weigher-stacker .....June *94
Two-pass automatic weighing system (e) .....Feb *152
Windows—Blocking heat from the sun May 172
In Florida plant of actinic glass Jan *113

Wines

Concrete vats give 7 benefits. F. Gallizio .....June *141
Condensed wine for French Army (N) .....Sept 188
Device polices capping operation. H. C. Englefield .....Jan *5
Germicidal lamps rigged up for use in wine storage. William Widmer Jan *114
Hazy wines .....Nov 181
Uniform quality wines made by using bulk-propagated yeast cultures. R. S. Fellers.....Dec *145
Wine made continuously (P)....Sept 173
Wiring—Tacker cuts wiring costs (e) June *117
Wood preservative extends life of crates, pallets (e) .....Aug *125

Wrapping

General Foods offer 9 new wrappers. R. de S. Couch.....June 109
High-speed wrapping register regulator (e) .....Mar *163
Improved wrapping operation seals ice cream-stick, too. A. V. Gemmill .....Oct *87
Machine applies insulating wrap on ice cream cartons (e).....Sept *115
Machine wraps with cellophane (e) Mar *149
Packaging show at Atlantic City June *110
Report on emergency packaging Apr *123-134
Wraps cookies, sandwiches, 40 packages a minute (e).....Oct *124
Wrapping see also Packaging

——X

X-rays

Inspecting cans with crystal x-ray device (e) .....Apr *135

——Y

Yeast

Bakers yeast—unique product. F. W. Nordsick .....Feb *101
From sulfite liquor (A).....Dec 171
How bakers yeast is made—flowsheet May *122
Testing methods for yeast (A). Feb 172
Torula yeast grown on spent sulfite liquor (A) .....Feb 171
Uniform quality wines made by using bulk-propagated yeast cultures. R. S. Fellers .....Dec *145
Yield of yeast and its quality influenced by many factors (A).June 179

Yogurt

Demand up (N) .....Oct 196
Strawberry Yogurt .....Oct 162

* Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents. (N) News.

Index to Vol. 23, January, 1951, to December, 1951

AUTHOR'S INDEX

A

Aamlid, Kaare & others. New shear-press predicts quality of canned limas Apr *112

Alton, A. J., Peter Noznick & G. C. North. Piloting a new product?.....Aug *102

Anderson, E. Here's an easily made spray-coater .....Jan *125

Anderson, E. A. Does fast barrel-washing job. .....May *7

Anderson, Elmer L. & J. F. Mullen. New homogenizing twist banishes weighing chores .....Oct *67

Appel, Nesbert & William Thew. Recorders assure better brews.....Mar *119

B

Baer, Ray A. Simplified work simplification .....July *76

Bahrenburg, Herbert D. Grain car sampling simplified .....Nov *9

Bartron, Lester R., Nelson R. Easton & Douglass J. Kelly. Jiffy test of chocolate temper .....Aug *147

Beach, Paul L. Speed your mold counts with this handy grid .....Oct *112

Beavan, F. C. Steam-and-water mixer made of scrap .....Aug *11
Truss to support pipe line.....Nov *11
Wall coils made self-supporting Oct *11

Becker, J. L. & Roger Becker. O_2 below 0.2 system guards quality status quo .....Nov *90

Becker, Roger & J. L. Becker. O_2 below 0.2 system guards quality status quo .....Nov *90

Beisel, C. G. How frozen concentrate biochemists are working out the fruit bugs .....Nov *82

Bemis, J. M. Baker cites electric oven benefits .....Feb *124

Berg, Roy E. Powder clarifier recovers more sugar .....Jan *58

Berk, Milton. Longer-life cutting table .....Aug *11

Bishop, William & James Dustin. Top-notch wet corn mill house.....Mar *121

Blake, A. F. "Ray-table" unit curbs bacteria on sugar .....Jan *77

Block, Zenas. Quality doughnuts—at 700 doz. an hour.....Jan *55

Bloedorn, C. W. Power—buy it? or make it? .....May *75

Bloomberg, Ray. Fish continuously frozen in towers .....Mar *96
New infra-red broilers make meat balls better .....Oct *91
Pack diced salmon in 4-lb cans May *93

Bloomberg, Ray & F. E. Hessey. Canned fresh milk now a reality.....June *71

Boddington, R. J. Plant built to product .....Nov *68

Bradshaw, D. Unit heater makes good syrup cooler .....Nov *13
Way to avoid sour mops.....Nov *13

Browning, J. E. & C. R. Havighorst. Top efficiency attained by 4-pt advanced engineering .....Nov *92

Bullis, Harry A. General Mills' progress .....June *105

Liebman, Charles E. Three P's to profits ..... Dec. *88
Little, Donald H. Just how effective is warfarin? ..... Aug *69

M

Malcom L. E. Quick bacon cure saves 17 days, reduces investment ..... May *80
Mando, Sam J. Electric saw cuts candy bars fast ..... May *11
Massey, George W. Engineering pegs popular price ..... Sept *86
McCarthy, F. W. Continuous top output in spic-and-span plant ..... Oct *98
Modern materials handling ..... Mar *107
McCready, R. M., A. D. Shepherd & Harry S. Owens. New, quick, cold-water dessert mix ..... July *44
Merrill, Roger L. & William Hecox. Automatic statistical control saves on package overfill ..... May *55
Meyer, Jack. Thermocouples raise efficiency, slash costs ..... Jan *75
Meyers, Gregg R. How to set a safety record ..... May *94
Millard, Ray & J. Carl Dawson. Safeguard your raw materials and you safeguard profits ..... Sept *67
Miller, Byron S. & J. A. Johnson. Fungal enzymes help you make better bread pt 1 Mar *80 pt 2 Apr *161
Miller, Gerard. Nitrogen technic assures fine grinding ..... July *86
Miller, Howard. Hand spray used to apply oil ..... Feb 133
Miller, Ivan C. "Fenced-in" lift truck does big job ..... May *133
Ingenious roller-bed trailer slashes delivery costs ..... Oct *105
Mechanized continuous process pays six extra benefits ..... Sept *103
Rigs mail-meter as labeler and cuts costs ..... Dec. *141
Superior animal shortening ..... Aug *88
They engineered farm-to-family quality ..... Dec *95
They improved their processing 8 ways ..... Jan *86
Miller, Ivan C. & Roy Park. Operation quality: it shows how better foods will win a widespread market..Oct *94
Miller, Robert N. & William E. Robertson. Double shelf life?—It's "in the bag" (table) ..... July *38
Mullen, James F. & E. L. Anderson. New homogenizing twist banishes weighing chores ..... Oct *67

N

Nelson, Jack & R. F. Cohee. Phytates will stop cherry discoloration..Mar *91
Nelson, John W. Rig delivers air wherever needed ..... Aug *7
Nordsiek, Frederic W. Bakers yeast—unique product ..... Feb *101
North, G. C., A. J. Alton & Peter Noznick. Piloting a new product?..... Aug *102
Noznick, Peter, G. C. North & A. J. Alton. Piloting a new product? Aug *102

O

Orr, Harold & Milton Kinney. Fills cans automatically, doubles output..Feb *131
Owens, Harry S., A. D. Shepherd & R. M. McCready. New, quick, cold-water dessert mix ..... July *44

P

Pagel, L. E. Speeds potato-quality test Sept 13
Paquette, William E. & William Gelde. Easy removal of sludge from ammonia ..... July *9
Park, Roy & I. C. Miller. Operation quality: it shows how better foods will win a widespread market..Oct *94
Parker, Leo T. Legality it's this way..Mar *84
Patton, Stuart. New roquefort-type flavors ..... Dec *93
Paul, Allen B. Trends bring shafts in baking ingredients ..... Feb *94
Peryam, David R. & others. New flavor evaluation method ..... Aug *83
Post, L. C. Insulation blower now handles corn ..... July *5
Potter, Earl F. New moisture test gives faster results ..... Jan *85
Prince, Richard N. Now—a readily made fondant for bakers, confectioners Aug *100

R

Ramsbottom, J. M., P. A. Goeser & H. W. Shultz. How light discolors meat: what to do about it..... Feb *120
Reed, W. A. Bagging devices prevent dusting ..... Aug *9
Better machine lubrication..... Sept *7
Electrical panels made safer.... Mar *131
For cutting odd shapes with a torch Oct *9
Many uses for those grip pliers..Apr *11
Puts permanent code in jar caps Nov *11
Roof filter protects air machines. Jan *114
Reeves, R. C. Research that spells results Feb *85
Remaley, Robert J. & others. New flavor evaluation method ..... Aug *83
Riedel, Walter. Gluing of milk cartons improved ..... Sept *13
Ritchie, E. C. & G. Smith. "How" and "why" of Danish's grade A milk powder ..... Apr *110
Robertson, William E. & Robert N. Miller. Double shelf life?—It's "in the bag" (table) ..... July *38
Rogers, Hatton & others. New shear-press predicts quality of canned limas Apr *112
Rubinate, Frank & Albert V. Grundy. Military packaging ..... Sept *111
